Watertight Easy & Safe

Our IP67 Easy & Safe is a perfect choice in most applications where water and dirt can occur. They combine easy access to contact parts during installation with high protection degree while the products are in use. Electrical contacts protected against liquids and dirt retains its performance over time. High contact performance means reliability, reducing downtime and lowers maintenance costs.

Industrial plugs and sockets
Screwless Fast & Safe

In times with high focus on productivity screwless terminal connectors are growing in popularity. Actually up sixty percent of the installation time can be saved with screwless terminals.

We are now completing our standard offering with Fast & Safe in parallel with Easy & Safe. Fast & Safe is a complete offering of 16-32A plugs and sockets, both as IP44 and IP67. Instead of a screw providing contact pressure at the terminal, Fast & Safe is built on spring technology. More than reducing installation time spring technology has high resistance against vibrations and heat fluctuations.

Industrial plugs and sockets
Critical & Safe

Our new industrial plugs and sockets complements ABB's strong low-voltage offer. These plugs and sockets are part of Critical & Safe. Critical & Safe is a product range suitable for general use in most applications.

"Critical & Safe is the range for applications with high demands on safety, durability and performance. The product range is perfect for applications with frequent connection/disconnection, and to use in public areas. Switch interlock system provides high product and personal safety, thanks to the mechanism it is not possible to turn on the product if a correct plug is not engaged, which in turn means that the risk of personal injuries decreases if by accident coming in contact with live parts. The plug cannot be disengaged if the mechanism is turned on. The only way to engage and disengage the plug from the socket outlet is if the mechanism is switched off.

The housing is made of PBT or aluminum. PBT is a tough plastic material that withstands heavy-duty usage and most chemicals found in industrial environments. The aluminum housing is a mix of aluminium and silicon called silumin, which gives an excellent protection against corrosion while being robust and tough against impact and sunlight."

TOUGH & SAFE

Product overview
Tough & Safe

Tough & Safe is the range for applications in environments that have high demand of functionality and safety. The robust housing is made of PBT plastic. The range Tough & Safe is available as watertight (IP67, 16-125 A) and splashproof (IP44, 63 A).

The devices are equipped with internal and external cable clamps. The 63A and the 125 A devices are equipped with two screws on each terminal.

Features
- IP67 Watertight or IP44 Splashproof
- 16-125 A, 50-690 VAC
- IEC 60 309-1, -2
- All external screws are made of stainless steel

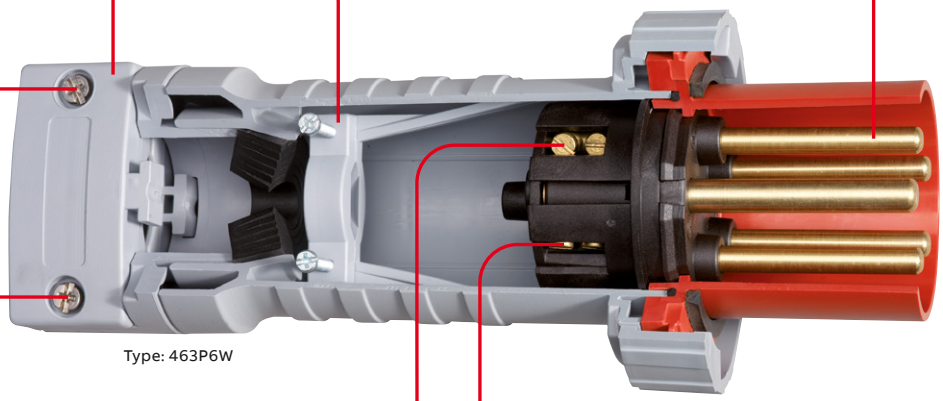
Application examples
- Industry/workshops
- Harbours/shipyards
- Mines
- Food & beverage

Clear marking, at the front and the rear of the terminals
Ground ⏚
Neutral N
Phase L1, L2, L3

Internal and external cable clamp

Clean brass pins

External screws made of stainless steel



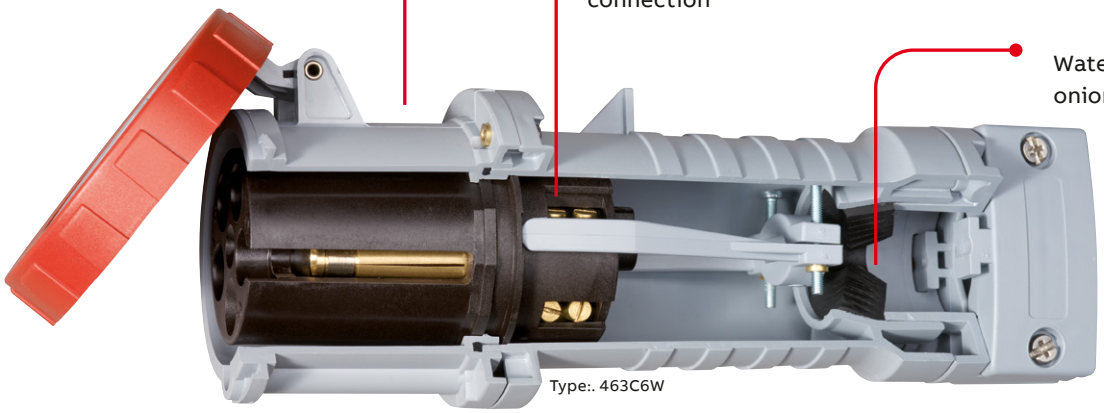
Type: 463P6W

Rear terminals, raised lettering, identification contacts

Robust plastic housing that withstands most chemicals found in industrial environments

Two screws at each terminal to assure safe and reliable cable connection

Watertight chloroprene onion skin grommet



Type:. 463C6W

* LP: These products are equipped with pilot contacts. In all products with pilot contacts according to IEC 60 309-1 and -2, the pilot pin and sleeve are shorter than the other connecting pins and sleeves.

This means that the "pilot circuit" breaks before and connects after the main circuit giving optimum safety. The maximum connection area is 4 mm²

These products are equipped with pilot contacts. In all products with pilot contacts according to IEC 60 309-1 and -2, the pilot pin and
sleeve are shorter than the other connecting pins and sleeves.

This means that the ”pilot circuit” breaks before and connects after the main circuit giving optimum safety. The maximum connection area is 4 mm².

Modular Combi
Parts

Here you can design your installation solution in IP44

Modular combi parts are Easy to assemble and install. It is a flexible and time efficient choice for special applications. Modular combi parts can be assembled to a height of 2 meters and there is a possibility to build on the width by looping if required. Din rail are suitable for 13 modules with a lot of space for your socket outlets protection. There are a large number of socket outlets to choose from our Easy & Safe and Tough & Safe Range depending on which IP degree and material that is required. There is also a possibility to have switched interlocked socket outlet to maximize personal safety. Assembled enclosure is tested and fulfills IP44 protection degree and can handle Socket outlets up to 63A. Enclosure parts in plastic PBT.

Industrial plugs and sockets
Extra low voltage

Our extra low voltage range offers Industrial plugs & sockets for protection in areas with a high risk like swimming pools, wandering-lead hand lamps, and other portable appliances for outdoor use. Therefore our range includes products of IP44 and IP67.

Our range of Industrial plugs and sockets for extra low voltage covers voltages up to 50V AC or DC and fulfills IEC 60309.

Extra low voltage is one way to protect from electrical shock. Extra-low voltage is used where the risks are high: swimming pools, wandering-lead hand lamps, and other portable appliances for outdoor use, etc.

The plugs and sockets are intended for an operating voltage not exceeding 50 V. Their rated voltage is 24 V and 50 V for 16 A and 32 A.

Standards
The products are designed according to the following standards: IEC 60 309-1, 60 309-2.

Connections
Screw type terminals.

Non-interchangeability
To achieve non-interchangeability, the plugs and sockets have a main key and a secondary key. The position of the secondary key is indicated by a number followed by a letter h (the hour position or o´ clock position). The number is determined by the position of the secondary key relative to the main key, the position of which is defined as 6 o´clock. Non hour position is given for 20-25 V, 50-60 Hz, since there is no secondary key on these plugs and sockets.
The width of the key is different for 16 A and 32 A plugs and sockets. In addition, there is a color coding system: the cover or front part is violet on 20-25 V and white on 40-50 V plugs and sockets. Plugs and sockets for direct current are grey.

Industrial plugs and sockets
High current connectors

The right soloution for every application.
The connector product portfolio covers almost all application in the defined high current range.

C-Line - 200 A/250 A
The compact C-Line connectors have a robust plastic housing and are perfect for applications with limited space conditions as well as for certain industries (chemistry, food industry). Additional options allow use in a variety of applications.

B-Line - 250 A/400 A
The robust B-Line connectors are ideal for applications (tunneling, mining), where high mechanical loads may arise. Furthermore, numerous options, such as the saltwater resistant housing, make the connectors also suitable for marine applications.

Connector units 200 A...400 A
To ensure maximum safety for users, we can offer special connector units:
CUMI (connector unit with mechanical interlock)
CUBC (connector unit with block contactor)
CUCB (connector unit with circuit breaker)

High current connectors

In applications where high current connectors are used, safety, quality and reliability are the top priorites for customers.

Connectors for challenging applications
In order to fulfill this task, all these properties were bundled into one product range. Thus, all customers receive a product with the highest degree of performance.

Whether in tunnel construction, where extremely mechanical strength is required or railway applications where vibration-proof is of highest importance, the high current connectors are always the right choice.

Robust housing
The connectors are designed for ambient temperatures from -40 C to +100 °C. This ensures full functionality at low and very high temperatures. This leads to significantly fewer plant failures (reduced risk of overheating) and reduced fire risk. Another important aspect for various industries, such as tunnel construction, construction sites, mines is the high robustness of the connectors. These can withstand loads of up to 2 tonnes.

IK Code
The IK code is a coding system according to IEC/EN 50102 or IEC/EN 62262, which indicates the degreee of protection by a housing against harmful external stresses. Each characteristic number of the IK code represent a stress relief value.

IK code	01	02	03	04	05	06	07	08	09	10
Stress energy joule	0.14	0.2	0.35	0.5	0.7	1	2	4	10	20

The connectors of the C-Line and B-Line are IK 10 classified.

Finger touch protection
Each socket is equipped with a finger touch protection in order to safeguard the user against electrical shocks in the event of unintentional contact with live parts.

IP67/IP55
The connectors are IP67. They are dust-proof and suitable for temporary immersions under water. The connector units are IP55, which means protected against dust and splashing water.
- Always reliable in adverse environmental conditions
- Suitable for high humidity applications
- Low maintenance (no dust/moisture penetration)
- High security ensured at all times

Voltage coding
Arrangement of the PE contact pin and bushing to prevent wrong plugging of various voltages and frequencies after the time setting in accordance with table 104 from EN 60309-2. The standard earthing contact specifies the time setting.

Applications
Connectors for every task
- Tunnel contruction
- Marine
- Railway
- Military
- Industry
- Construction site
- Event technology
- Mining
- Chemistry

Characteristics
- 200 A...400 A
- Robust housing
- 4- and 5-poles
- High reliability
- Compact design
- IP 67
- Finger touch protection
- Designed for high temperatures
- Vibration resistent

Special applications - on request
- Vibration resistants screws
- Seawater resistant housing
- Harnessed connectors

Customized solutions
If standard solutions do not meet all the requiremens of an application, customer-specific solutions are made upon request.

B-Line

The robust B-Line connectors are ideal for applications (tunneling, mining), where high mechanical loads may arise. Furthermore, numerous options, such as the saltwater-resistant housing, make the connectors also suitable for marine applications.

Busch-rotary dimmer [1] Flush-mounted, DALI, with internal power supply, tunable white

For DALI broadcast service (via central telegram).
With integrated DALI power adaptor.
For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface.
With rotary control and ON/OFF push operation.
For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8).
Colour temperature can then be set between 2,700 K - 6,500 K.
With electronic short-circuit protection.
With electronic overload protection.
Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Up to 3 potentiometers are connectable in parallel in active mode.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
DALI-voltage: 15,5 V=
Rated current: max. 75 mA
Power consumption: < 2,5 W
Number of DALI-units:
37 in case of one active power-potentiometer
in case of three active power-potentiometer in parallel connection: 111
Active mode: the potentiometer is supporting the necessary control circuit for other DALI-devices.
Passive mode: the potentiometer is suitable as additional operation point.
Max. DALI-cable length: 300 m (1,5 - 2,5 mm²).
Without cover plate.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Protection class (Device): IP 20
Temperature range (Device): 0 °C to 35 °C

WLAN access point, flush-mounted [1] [2]
power supply from mains power

END OF LIFE

Operation as WLAN access point for the connection of WLAN terminal devices to the LAN.
Operation as WLAN repeater for extending the transmission range of a WLAN.
Operation as WLAN adapter for integrating Ethernet terminal devices into a WLAN.
Supports WLAN standards IEEE 802.11b/g/n with 2.4 GHz; integrated WLAN antenna.
Backward connection of an Ethernet cable via screw terminals (10/100 Mbit/s). Front-side Ethernet connection via a RJ45 socket (10/100 Mbit/s).
The three connections (WLAN, Ethernet/screw terminals and Ethernet/RJ45)can be used in parallel via the integrated switch. Power supply via 2-pole connecting terminal. Nominal voltage: 100 - 240 V~
For mounting in commercially available deep flush-mounted and hollow-wall boxes.
Rated frequency: 50 Hz - 60 Hz
Protection class (Device): IP 20
Dimensions: (L x W x D): 80 mm

Busch-dynasty®
Rocker switches / push switches

Bluetooth Low Energy (BLE) smart switch insert. Wall transmitter, 2 / 4 channel

For smart switch rockers 6735 BT-8xx and 6736 FoH-8xx.
- Smart switch for wireless remote control of radio components.
- Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.
- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Depending on the ecosystem, the wireless range is automatically extended via mains-powered BT mesh devices (repeater function).
- Encrypted transmission with AES-128 (CBC mode) and sequence counter.
- Contains NFC configuration interface according to NFC Forum Type 2 Tag (ISO/IEC 14443 Part 2 + 3).
- Therefore particularly simple commissioning of BLE radio components from Casambi.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.
- Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.

Including fixing plate for mounting on smooth walls or on switch boxes.

Busch-rotary dimmer [1] Flush-mounted, DALI, tunable white

For DALI broadcast service (via central telegram).
For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface.
With rotary control and ON/OFF push operation.
Fool proved. For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Max. current consumption: 15 mA. Not suitable for combining with other DALI sensors or central units of other manufacturers. For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE article no. 2116/11 U.

ABB flexTronics inserts

Proximity switch

END OF LIFE

3 wire connection (neutral conductor required).
Relay insert with proximity sensor.
For contactless ON/OFF switching of electric loads, e.g. lights. For switching incandescent lamps, 230 V tungsten halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are actuated via transformers. Switches when detecting an approach at < approx. 5 cm. Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps, 230 V halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are operated via transformers.
Rated current: 10 AX. Rated power: 2300 W/VA
Temperature range (Device): -25 °C to 55 °CBritish Standard EN 60669-2-1

[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Comfort switch flex sensor [1] [2]

Movement detector push-button switch combination. For switching lighting systems that depend on brightness and movement. With select lens, prevents detection of smaller animal. Push switch function possible at all times. With notice LED when manual operation is necessary. Extension of the detection range by main unit/extension unit combination. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off.
Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off. Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off. With continuous light/continuous Off function. Adjusting elements on rear side. Surveillance density: 9 sectors with 28 switching segments. Switch off delay: 1 to 10 min., adjustable. Compatible with all ABB flexTronics inserts. For relay insert flex, 1gang, 64811 U-500
For relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.

WaveLINE control elements

Wall-mounted transmitter WaveLINE [1] [2] 1-channel

1gang wall-mounted transmitter independent of mains power supply.
With labelling field and labelling strip.
For switching and dimming.
For controlling blinds and light scenes.
1 radio channel can be operated or up to 2 light scenes can be called up.
For flush-mounted WaveLINE actuators 6701-101, 6702, 6703, 6704 and 6705-101.
For LED display WaveLINE 6730-xxx.
Compatible with WaveLINE KNX gateway TP-RF 6770.
Send frequency: 868 MHz.
Free-field range: approx. 100 m.
Power supply: lithium button cell battery Type CR2032.
Battery service life: typically 5 years, therefore practically maintenance-free.
Automatic monitoring of battery life.
Including fixing plate for mounting on smooth walls or on switch boxes.
Control element: rocker switch left/right
Display elements: LED to indicate the transmission
Rated voltage: 3 V-
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 63 mm x 16 mm

For ABB i-bus® KNX 6120/12-101, 6120/13.
With labelling field.
Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green.
Push switch function: switching / dimming / blind / sending values / scenes etc.
Transparent labelling sheet with standard symbols included in delivery.
Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.).
Control element: rocker switch left/right
Display elements: Two LED per rocker via separate communication object for status (Red/ Green/ OFF) or orientation light.
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 63 mm

Busch-Watchdog 180 flush-mounted standard sensor [1]

For ABB i-bus® KNX 6120/12-101, 6120/13.
Movement detector with up to 4 channels.
Incl. 10 logic channels (light scene actuator, sequence actuator, logic gates, etc.).
Detection range: frontal: 6 m, lateral: 6 m
Detection angle: 180 °
Brightness limit value: 5 Lux - 150 Lux
Mounting height: 1.1 m
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 63 mm x 18 mm

Bluetooth Low Energy (BLE) smart switch insert
Wall transmitter, 2 / 4 channel

For smart switch rockers 6735 BT-8xx and 6736 FoH-8xx.
- Smart switch for wireless remote control of radio components.
- Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.
- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Depending on the ecosystem, the wireless range is automatically extended via mains-powered BT mesh devices (repeater function).
- Encrypted transmission with AES-128 (CBC mode) and sequence counter.
- Contains NFC configuration interface according to NFC Forum Type 2 Tag (ISO/IEC 14443 Part 2 + 3).
- Therefore particularly simple commissioning of BLE radio components from Casambi.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.
- Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.

Including fixing plate for mounting on smooth walls or on switch boxes.

For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8).
Colour temperature can then be set between 2,700 K - 6,500 K.
Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Max. current consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE article no. 2116/11 U.

WLAN access point, flush-mounted [1] [2]
power supply from mains power

END OF LIFE

Operation as WLAN access point for the connection of WLAN terminal devices to the LAN.
Operation as WLAN repeater for extending the transmission range of a WLAN.
Operation as WLAN adapter for integrating Ethernet terminal devices into a WLAN.
Supports WLAN standards IEEE 802.11b/g/n with 2.4 GHz; integrated WLAN antenna.
Backward connection of an Ethernet cable via screw terminals (10/100 Mbit/s).
Front-side Ethernet connection via a RJ45 socket (10/100 Mbit/s).
The three connections (WLAN, Ethernet/screw terminals and Ethernet/RJ45)can be used in parallel via the integrated switch.
Power supply via 2-pole connecting terminal. Nominal voltage: 100 - 240 V~
For mounting in commercially available deep flush-mounted and hollow-wall boxes.
Rated frequency: 50 Hz - 60 Hz

WaveLINE control elements

Wall-mounted transmitter WaveLINE [1] [2] [3] 1-channel

1gang wall-mounted transmitter independent of mains power supply.
With labelling field and labelling strip.
For switching and dimming.
For controlling blinds and light scenes.
1 radio channel can be operated or up to 2 light scenes can be called up.
For flush-mounted WaveLINE actuators 6701-101, 6702, 6703, 6704 and 6705-101.
For LED display WaveLINE 6730-xxx.
Compatible with WaveLINE KNX gateway TP-RF 6770.
Send frequency: 868 MHz.
Free-field range: approx. 100 m.
Power supply: lithium button cell battery Type CR2032.
Battery service life: typically 5 years, therefore practically maintenance-free.
Automatic monitoring of battery life.
Including fixing plate for mounting on smooth walls or on switch boxes.
Surface painted.
Control element: rocker switch left/right
Display elements: LED to indicate the transmission
Rated voltage: 3 V-
Protection class (Device): IP 20
Temperature range (Device): -5 °C to 45 °C
Dimensions: (L x W x D): 63 mm x 63 mm x 16 mm

[7] Recommendation: Please use loads and types of one producer.
[8] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[9] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Dimmers

Busch-rotary dimmer [1])
Flush-mounted, DALI, tunable white

For DALI broadcast service (via central telegram).
For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface. With rotary control and ON/OFF push operation. Fool proved.
For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF). Up to 5 potentiometers are connectable in parallel. Max. current consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE article no. 2116/11 U.
Max. DALI-cable length: 300 m (1,5 - 2,5 mm²).
Without cover plate. Protection class (Device): IP 20
Temperature range (Device): 0 °C to 35 °C

[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Extension insert flex [1]

3 wire connection (neutral conductor required). For the extension of the Busch-Comfort switch or presence detector installations. For group control of flex inserts via extension unit communication. Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units. Without control cover. For control element flex, 1gang, wireless, 62711-WL. For control element flex, 2gang, wireless, 62721-WL. For Busch-Watchdog 180 flex sensors 6476x-... . For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL. Combinable with all flex inserts. Movement detector push-button switch combination.
For switching lighting systems that depend on brightness and movement.
With select lens, prevents detection of smaller animal.
Push switch function possible at all times.
With notice LED when manual operation is necessary.
Extension of the detection range by main unit/ extension unit combination.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off.
Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off.
Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off.
With continuous light/continuous Off function.
Adjusting elements on rear side.
Surveillance density: 9 sectors with 28 switching segments.
Switch off delay: 1 to 10 min., adjustable.
Compatible with all ABB flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.

Bluetooth Low Energy (BLE) smart switch complete set. Wall transmitter, 2/4 channels

Consisting of BLE smart switch insert 6716 UBT, 2gang rocker 6736 FoH-8xx for smart switches, 1gang future® linear cover frame, fixing plate and intermediate ring. Smarter light switch for wireless remote control of BLE radio devices. Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.

- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.
- Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.

Fool proved.
Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Max. current consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
An additional DALI power supply is needed, e.g. by Tridonic, Philips, Helvar or 2117/11 U.
Max. DALI-cable length: 300 m (1,5 - 2,5 mm²).
Without cover plate.
Protection class (Device): IP 20
Temperature range (Device): 0 °C to 35 °C

ABB flexTronics comfort switch sensor

Comfort switch flex sensor [1) 2)]

Movement detector push-button switch combination.
For switching lighting systems that depend on brightness and movement.
With select lens, prevents detection of smaller animal.
Push switch function possible at all times
With notice LED when manual operation is necessary.
Extension of the detection range by main unit/ extension unit combination.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Additional activation/deactivation option via push-button input on the flush-mounted insert.
Adjustable operating mode: automatic mode, automatic (motion-controlled) switch-on and switch-off.
Adjustable operating mode: semiautomatic, manual switch-on, automatic (timer and movement-controlled) switch-off.
Adjustable operating mode: automatic mode, automatic switch-on, manual switch-off.
With continuous light/continuous Off function.
Adjusting elements on rear side.
Surveillance density: 9 sectors with 28 switching segments.
Switch off delay: 1 to 10 min., adjustable.
Compatible with all ABB flexTronics inserts.
For relay insert flex, 1gang, 64811 U-500.
For relay insert flex, 2gang, 64821 U-500.
For e-contact insert flex, 1gang, 64814 U-500.
For LED touch dimmer insert flex, 1gang, 64851 U-500.
For extension insert flex, 64891 U-500.
Display elements: LED for status display.
Control element: 2 controllers for setting the brightness switching threshold and switch-off delay.
Detection range: frontal: 5 m, lateral: 3 m, at mounting height: 1.1 m.
Detection angle: 170°.
Brightness limit value: 5 Lux - daytime operation.
Operation mounting height: 0.8 m - 1.2 m.
Temperature range (Device): -5 °C to 45 °C.
Dimensions: (L x W x D): 63 mm x 63 mm x 28 mm.

Consisting of BLE smart switch insert 6716 UBT, 2gang rocker 6736 FoH-8xx for smart switches, 1gang future® linear cover frame, fixing plate and intermediate ring. Smarter light switch for wireless remote control of BLE radio devices. Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.
- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.
- Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.

Including fixing plate for mounting on smooth walls or on switch boxes.

Rocker switches / push switches

Bluetooth Low Energy (BLE) smart switch insert. Wall transmitter, 2 / 4 channel

For smart switch rockers 6735 BT-8xx and 6736 FoH-8xx.

- Smart switch for wireless remote control of radio components.
- Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.
- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Depending on the ecosystem, the wireless range is automatically extended via mains-powered BT mesh devices (repeater function).
- Encrypted transmission with AES-128 (CBC mode) and sequence counter.
- Contains NFC configuration interface according to NFC Forum Type 2 Tag (ISO/IEC 14443 Part 2 + 3).
- Therefore particularly simple commissioning of BLE radio components from Casambi.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.
- Can be mounted freely in the room with the enclosed adhesive tape and fixing plate.

Including fixing plate for mounting on smooth walls or on switch boxes.

Dimmers

Busch-rotary dimmer [1] [2] [3] [4] [5] [6] [7] [8] [9]
Flush-mounted, LED, 2-100 W

With rotary control, two-way switch and soft-catch.
2-wire connection (neutral conductor not required)
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
Via mode switch adjustable between leading edge control and trailing edge control.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.
With adjustable minimum brightness.
Without cover plate.
Rated voltage: 230 V~, + 10% / - 10%
Rated frequency: 50 Hz/60 Hz
Nominal power: 2 - 100 W/VA (retrofit LED loads).
Nominal power: 10 - 250 W/VA (non-LED loads).

Busch-rotary dimmer [1]
Flush-mounted, DALI, tunable white

For DALI broadcast service (via central telegram).
For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface.
With rotary control and ON/OFF push operation.
Fool proved.
For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8).
Colour temperature can then be set between 2,700 K - 6,500 K.
Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Max. current consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE article no. 2116/11 U.
Max. DALI-cable length: 300 m (1,5 - 2,5 mm²).

Proximity switch

END OF LIFE

3 wire connection (neutral conductor required).
Relay insert with proximity sensor.
For contactless ON/OFF switching of electric loads, e.g. lights.
For switching incandescent lamps, 230 V tungsten halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are actuated via transformers.
Switches when detecting an approach at < approx. 5 cm.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz - 60 Hz
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V incandescent lamps, 230 V halogen lamps, fluorescent lamps and low-voltage halogen lamps, that are operated via transformers.
Rated current: 10 AX

[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

ABB flexTronics movement detector sensors

Busch-Watchdog 180 flex, comfort sensor [1] [2] with multi-lens

Movement detector sensor with with measurement of ambient light. For automatic switching of devices dependent on motion and brightness. Push switch function possible at all times. For detection down to the floor. For detection in stairwells. With 4 detection levels. In combination with dimmer insert flex: dimming function of lighting and selectable light value storage. With enabling of pre-warning of switch-off for stairwell operation. Compatible with all free@home flex inserts. Adjusting elements on rear side. Multi-lens: suitable also for mounting heights of 2.20 m. Extension of the detection range by means of master/slave combination. Additional activation/deactivation option via push-button input on the flush-mounted insert. With continuous light/ continuous Off function. With detection display in test mode. Surveillance density: 54 sectors with 224 switching segments. Switch-off delay: approx. 10 sec - 30 min or short-time pulse 1 sec adjustable. For relay insert flex, 1gang, 64811 U. For e-contact insert flex, 1gang, 64814 U. For series relay insert flex, 2gang, 64821 U. For LED touch dimmer insert flex, 1gang, 64851 U. For extension insert flex, 64891 U. Mounting height: 31 mm. Control element: 2 controllers for setting the brightness switching threshold and switch-off delay. Detection range: frontal: 8 m, lateral: 7 m, Mounting height: 1.1 m. Detection range 2: frontal: 8 m, lateral: 8 m, Mounting height: 2.2 m. Detection angle: 180 °. Brightness limit value: 5 Lux - 500 Lux Up to daytime operation. WLAN access point, flush-mounted [1] [2]
power supply from mains power

END OF LIFE

Operation as WLAN access point for the connection of WLAN terminal devices to the LAN. Operation as WLAN repeater for extending the transmission range of a WLAN. Operation as WLAN adapter for integrating Ethernet terminal devices into a WLAN.
Supports WLAN standards IEEE 802.11b/g/n with 2.4 GHz; integrated WLAN antenna. Backward connection of an Ethernet cable via screw terminals (10/100 Mbit/s). Front-side Ethernet connection via a RJ45 socket (10/100 Mbit/s). The three connections (WLAN, Ethernet/screw terminals and Ethernet/RJ45) can be used in parallel via the integrated switch.
Power supply via 2-pole connecting terminal.
Nominal voltage: 100 - 240 V~. For mounting in commercially available deep flush-mounted and hollow-wall boxes. Rated frequency: 50 Hz - 60 Hz. Protection class (Device): IP 20. Dimensions: (L x W x D): 80 mm

Notes

basic55®

One concept, numerous possibilities.

Those who design their living space wish to do it according to their own personal design concept. Which means that the colours must match the concept. And here basic55® convinces with two distinctive lines and several colour options. The available combinations of frames and rockers make it possible to adapt them harmoniously to all surroundings and individual style.

UP, LED, 2-400 W

Very small installation depth: < 20 mm
Without claws.
With rotary control, two-way switch and soft-catch.
2-wire connection (neutral conductor not required)
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi).
For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers.
For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps.
Mix operaton of LEDi with conventional loads possible.
With manually adjustable operating mode: trailing / leading edge control.
With adjustable minimum/maximum brightness.
Low-noise level by MOSFET transistors.
With electronic short-circuit protection.
With electronic overload protection.

Flush-mounted, DALI, tunable white

For DALI broadcast service (via central telegram).
For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface.
With rotary control and ON/OFF push operation.
Fool proved.
For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8).
Colour temperature can then be set between 2,700 K - 6,500 K.
Brightness power-on level and backround brightness level adjustable, buffered.
With integrated LED illumination for orientation.
Color of orientation light adjustable (18 presets and OFF).
Up to 5 potentiometers are connectable in parallel.
Max. current consumption: 15 mA.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
For the generation of the DALI voltage a power supply according to IEC 62386 is required; e.g. from Tridonic, Philips, Helvar or BJE article no. 2116/11 U.
Max. DALI-cable length: 300 m (1,5 - 2,5 mm²).

ABB flexTronics inserts

Relay insert flex, 1gang [1])

3 wire connection (neutral conductor required).
For switching lighting systems.
Operation in 1gang 2way installations via push switch-unit for combination with flush-mounted units.
Operation also possible via conventional push buttons (2020 US, 2021/6 UK).
Without control cover.
For control element flex, 1gang, wireless, 62711-WL.
For control element flex, 2gang, wireless, 62721-WL.
For Busch-Comfort switch flex control element 64765-... .
For Busch-Watchdog 180 flex sensors 6476x-... .
For Busch-Watchdog 180 flex sensors, wireless, 6276x-...-WL.
Combinable with extension insert, 64891 U.
Rated voltage: 230 V~, +10 % / -10 %
Rated frequency: 50 Hz
Inputs: 1
Outputs: 1x Normally open contact, potential-bound
Suitable for: 230 V- LEDi, typical.
Rated power: 300 VA
Suitable for: 230 V incandescent lamps/230 V halogen lamps
Rated power: 2300 W
Suitable for: Low voltage halogen lamps that are operated via transformers.

[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Light controls - Rotatory dimmers

LED dimmer

Very small installation depth: < 20 mm Without claws.
With rotary control, two-way switch and soft-catch.
2-wire connection (neutral conductor not required)
Optimised for dimming of retrofit LED lamps (LEDi).
For dimmable Retrofit-LEDs (LEDi). For dimmable Retrofit-LEDs (LEDi) with conventional or electronic transformers. For incandescent lamps, 230 V tungsten halogen lamps, low-voltage halogen lamps with conventional or electronic transformers and dimmable energy-saving halogen lamps. Mix operaton of LEDi with conventional loads possible. With manually adjustable operating mode: trailing / leading edge control. With adjustable minimum/maximum brightness. Low-noise level by MOSFET transistors. With electronic short-circuit protection. With electronic overload protection. Without cover plate. Rated voltage: 230 V~, + 10% / - 10% Rated frequency: 50 Hz/60 Hz Nominal power: 2 - 100 W/VA (leading edge control) Nominal power: 2 - 400 W/VA (trailing edge control)
Protection class (device): IP 20
Temperature range (device): 0 °C - 35 °C
Illuminable with neon lamp. Neon lamp included in delivery with cover plate. In the case of conventional transformers, take ~20% transformer loss into account. In case of electronic transformers, 5 % transformer losses. Also applicable for 1gang 2way installations. Provided with terminal for net disconnection devices. Only in conjunction with standard flush-mounting boxes according to DIN 49073, erect or Busch-Jaeger No. 3040 wallbox stonework, 3050 wallbox cavity wall or 3060 wallbox concrete)
Recommendation: Please use loads and types of one producer.
The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Rotary DALI dimmer Flush-mounted, tunable white.

For DALI broadcast service (via central telegram). For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface. With rotary control and ON/OFF push operation. Fool proved. For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. Brightness power-on level and backround brightness level adjustable, buffered. With integrated LED illumination for orientation. Color of orientation light adjustable (18 presets and OFF). Up to 5 potentiometers are connectable in parallel. Max. current consumption: 15 mA. Not suitable for combining with other DALI sensors or central units of other manufacturers. For the generation of the DALI voltage a power supply according to IEC 62386 is required. Max. DALI-cable length: 300 m (1,5 - 2,5 mm²). Without cover plate.

Rotary DALI dimmer Flush-mounted, DALI, with internal power supply, tunable White

For DALI broadcast service (via central telegram). With integrated DALI power adaptor. For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface. With rotary control and ON/OFF push operation. For changing the colour temperature of >tunable white< lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. With electronic short-circuit protection. With electronic overload protection. Brightness power-on level and backround brightness level adjustable, buffered. With integrated LED illumination for orientation. Color of orientation light adjustable (18 presets and OFF). Up to 5 potentiometers are connectable in parallel. Up to 3 potentiometers are connectable in parallel in active mode. Not suitable for combining with other DALI sensors or central units of other manufacturers. DALI-voltage: 15,5 V= Rated current: max. 75 mA Power consumption: < 2,5 W Number of DALI-units: 37 in case of one active power-potentiometer in case of three active power-potentiometer in parallel connection: 111 Active mode: the potentiometer is supporting the necessary control circuit for other DALI-devices. Passive mode: the potentiometer is suitable as additional operation point. Max. DALI-cable length: 300 m (1,5 - 2,5 mm²). Without cover plate..3

Rated voltage: 230 V~ ; ± 10% - 50 Hz.
Suitable for blind, roller blind and awning drives with mechanical or electronic limit switch shut-off.
Two 230 V multi-way input terminals (Up/Down) for group control. Operating mode switch for the following modes: normal, louvre, base station, position.
Wind alarm, cleaning functions can be accommodated via extension input. For comfort timer control element 8165.31. Remote control with blind controls code: 8144.X.
Running time: 3 min.
Outputs: 2 Normally open contact.
Rated current: 3 A, cos φ0.5. Rated power: 690 VA.
Control/Signal outputs: 2.
Temperature range device: 0 °C to 35 °C.
Included: fixing claws.

Timer control element

For manual and time-controlled switching of blinds, roller blinds, awnings, lighting and other electrical devices.
With dusk to dawn program including (Astro-program).
Individual Astro adjustment and Astro blocking time.
The controlled devices can be manually operated at any time.
Simple setting via high-resolution display with background illumination. With preset switching times/date/time.
Factory-set switching times can be individually adjusted.
Automatic switchover from summer time to winter time (switch-off function). Switching times/programme are safely stored in the event of a mains power failure. Power reserve for time and date > 10 years. Simple toggling between manual/automatic/vacation modes.
Freely adjustable temperature and brightness-dependent sun protection function. Freely adjustable twilight function.
User-adjustable running times for blinds and air conditioning.
Programming possible only with control element attached and energized. 6 switching times per day can be user-defined for each day of the week. Astro switching times and switching times can be combined.
For universal relay switch insert 8161.
For blind control insert 8161.2.

Light controls - Wireless control

Wireless switch transmitter - 1 channel

1-gang wall-mounted transmitter independent of mains power supply. 1 radio channel for switching, dimming, controlling blinds or 2 light scenes can be called up. For wireless actuators: 8130.4, 8130.5, 8130.7 & 8130.6. MHz. Free-field range: approx. 100 m. Power supply: lithium button cell battery type CR2032.
Battery service life: typically 5 years, therefore practically maintenance-free. Rated voltage: 3 Vdc. Automatic monitoring of battery life. Including fixing plate for mounting on smooth walls or on switch boxes. Control element: switch contacts top/bottom. Display elements: LED to indicate the transmission. Temperature range device: -5 °C to 45 °C. Battery included in delivery.

Motion sensor & actuators

free@home 180° motion sensor

With select lens for detection with animal access. For automatic switching of ABB-free@home® actuators dependent on movement and brightness.
To be used with.
Detection range: frontal 6 m, lateral 3 m.
Detection angle: 180°.
Brightness limit value: 1 – 500 lux.
Protection class of device: IP 20.
Mounting depth: 14.1 mm.
To be installed with CP-MD-85 cover plates (mounting grid without claws included).

free@home 180° motion sensor/actuator

With select lens for detection with animal access.
Including an integrated actuator for switching 230 V~ devices.
Outputs: 1× normally open contact, potential free.
Suitable for: resistive.
Rated current: 10 A.
Rated power: 2300 W.
Suitable for: capacitive.
Rated current: 10 AX.
Detection range: frontal 6 m, lateral 3 m.
Detection angle: 180°.
Brightness limit value: 1 – 500 lux.
Protection class of device: IP 20.
Mounting depth: 31.5 mm.
To be installed with CP-MD-85 cover plates (mounting grid without claws included).

Wireless sensors

free@home Sensor unit - 1-gang - Wireless

Rated voltage: 230 Vac - 50/60Hz.
For transmitting switching, push-button, dimming and blind commands to an ABB-free@home® actuator.
Wireless communication with the free@home system.
With fixing claws.
Control element: switch contacts top/bottom.
Display elements: LED as light for orientation or display of the switching state.
Temperature range device: -5 °C to 45 °C.
Mounting depth: 32 mm.
To be installed with SR-1-85 cover plates.

Rated voltage: 230 Vac - 50/60Hz.
For switching 230 V~ consumers.
Wireless communication with the free@home system.
With integrated switch actuator. Switching function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.).
3 wire connection (neutral conductor required).
With 230 V extension unit input (On/Off).
With fixing claws.
Control element: switch contacts top/bottom.
Display elements: LED as light for orientation or display of the switching state.
Outputs: 1 Normally Open contact, potential-bound (output voltage: 230 Vac)
Suitable for: ohmic.
Rated current / power: 10 A / 2300 W.
Suitable for: capacitive.
Rated current / power: 10 AX / 2300 VA.
Suitable for: inductive.

free@home Sensor/Switch actuator - 2/2-gang - Wireless

Rated voltage: 230 Vac - 50/60Hz.
For switching 230 V~ consumers.
Wireless communication with the free@home system.
With integrated 2-gang switch actuator. Switching function is available also without prior programming (pre-configured).
Configuration can be changed later via the web interface (groups, scenes, etc.). The right sensor channel for programming additional functions (groups, scenes, etc.).
3 wire connection (neutral conductor required).
With two 230 V extension unit inputs (On/Off).
With fixing claws.
Control element: switch contacts top/bottom
Display elements: LED as light for orientation or display of the switching state.
Outputs: 2 Normally Open contacts, potential-bound (output voltage: 230 Vac).
Suitable for: ohmic.
Rated current / power: 5 A / 1200 W.
Suitable for: capacitive.

Wireless sensor & dimmer actuators

free@home Sensor/Dimmer actuator - 1/1-gang - Wireless

Rated voltage: 230 Vac - 50/60Hz.
For dimming 230 V~ loads.
Wireless communication with the free@home system.
With integrated universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, lowvoltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps. For dimmable Retrofit-LEDs (LEDi).
Dimming function is available also without prior programming (pre-configured). Configuration can be changed later via the web interface (groups, scenes, etc.).
2-wire connection (neutral conductor not required)
3-wire connection technology is possible as an option for improved load behaviour (for details see the manual).
With 230 V extension unit input (dimming brighter/darker, switching).
With fixing claws.
Control element: switch contacts top/bottom.
Display elements: LED as light for orientation or display of the switching state.
Outputs: 1 dimming channel.
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 20 - 180 W / VA.
Suitable for: LEDi and energy-saving bulbs; typical.
Rated power: 2 - 80 W / VA.
Temperature range device: -5 °C to 45 °C.
Mounting depth: 32 mm.
To be installed with SR-1-85 cover plates.

Touch displays

ABB-free@homeTouch 7"

For the central control of up to 16 configurable ABB-free@home® functions of type: switching, dimming, blind, RTC, scene, Philips HUE.
Display of the video image of the outdoor station of ABB-Welcome door entry system.
Suitable as room temperature controller extension unit (up to 8).
Surface mounting.
The bus can be connected via enclosed terminal block.
Display size / resolution: 17.8 cm (7") / 800 x 480
Consumer units: 11
Display elements: TFT Touch Display
Dimensions: (L x W x D): 155 mm x 218 mm x 29 mm
Programming only with bus voltage applied via the web interface of the System Access Point.
The power is supplied by the ABB-Welcome system controller or when using the ABB-free@home panel without an ABB-Welcome system, a separate ABB 24 V- power supply is required.
Protection class (device): IP30
Temperature range (device): -5 °C to 40 °C

ABB-free@homeTouch 4.3"

For the central control of up to 16 configurable ABB-free@home® functions.
For the display of configurable system messages.
A configurable primary function can be triggered with a multi-touch gesture.
Capacitive touch screen with closed glass surface.
With integrated room temperature controller and temperature sensor.
In connection with temperature sensor 6226/T the integrated room temperature controller can be fitted with a remote sensor.
Suitable as room temperature controller extension unit (up to 8).
Requires additional ABB power supply 24 VDC.
Display size / resolution: 10.9 cm (4.3") / 480 x 854.
Mounting height: 8 mm
Control element: freely programmable touch surfaces.
Display elements: LCD display
Bus voltage: 24 V-
Dimensions: (L x W x D): 104 mm x 143 mm x 53 mm
Programming only with bus voltage applied via the web interface of the System Access Point.

System Access Point

System Access Point - Wireless

For commissioning and remote control of the ABB-free@home® system.
With integrated free@home wireless antenna.
With integrated free@home bus connection.
Allows the execution of astro and time programs.
Commissioning and remote control is executed via the web interface or app.
No additional commissioning software is required.
Easy commissioning with WLAN ad-hoc mode.
WLAN modes switchable via local operation.
Connection to the home network via WLAN client mode or via CAT cable.
The bus connection is provided via the enclosed bus terminal.
Display elements: LED for status display.
Rated voltage: 230 V~; 50/60 Hz.
Bus voltage: 24 V.
Dimensions: (L x W x D): 110 mm x 170 mm x 31 mm
Programming via the web interface of the System Access Point.
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C

Weather station

Weather station

For recording and transmitting of brightness, temperature, wind speed and rain.
Weather data can be linked with actuators to automatically control functions.
Weather data can be visualized in the free@home web interface and the free@home app.
Wind speed measuring range 2 - 30 m/s
The bus can be connected via enclosed terminal block.
Rated voltage: 110 V~ - 230 V~; 50/60 Hz.
Bus voltage: 24 V-
Inputs: 4
Temperature range (sensor):
Brightness limit value: 1 lux - 100000 lux
Dimensions: (L x W x D): 108 mm x 121 mm x 227 mm
Protection class (device): IP44
Temperature range (device): -20 °C to 55 °C

Power supply

Power supply

Power supply with integrated choke.
Fast diagnosis due to LED display for operational readiness and errors.
The bus can be connected via enclosed terminal block.
Display elements: operational load/overload LED
Rated voltage: 127 V~ - 230 V~, +10 % / -15 %; 50/60Hz
Secondary: 30 V, +2 V / --2 V
Outputs: 1
Rated current: 640 mA
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm
Module width (DIN-rail): 4 MW

Binary inputs

Binary input 2-gang

Conventional push-buttons or auxiliary contacts can be connected to 2 channels. The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Flush-mounted device for installation in a 60 mm device box or distribution box.
The bus can be connected via enclosed terminal block.
Programming only with bus voltage applied via the web interface of the System Access Point.
Bus voltage: 24 V
Inputs: 2
Polling voltage: 20 V-
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C
Dimensions: (L x W x D): 39 mm x 40 mm x 12 mm.

The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information. The contact polling voltage is made available from the binary input itself. Extension of the connecting cables possible by a maximum of 10 m.
Flush-mounted device for installation in a 60 mm device box or distribution box.
The bus can be connected via enclosed terminal block.
Programming only with bus voltage applied via the web interface of the System Access Point.
Bus voltage: 24 V
Inputs: 4
Polling voltage: 20 V-
Protection class (device): IP20

Binary input 4-gang

The device detects AC/DC signals of 10 - 230 V via 4 channels. The information of the signal evaluation can be used for controlling ABB-free@home® actuators or for recording status information.
The bus can be connected via enclosed terminal block.
Programming only with bus voltage applied via the web interface of the System Access Point.
Bus voltage: 24 V
Inputs: 4
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 36 mm x 64 mm

Switch actuators

Binary input 8-gang / switch actuator 8-gang

Combination device with 8 binary inputs and 8 switch actuators.
Conventional push-buttons or auxiliary contacts can be connected to 8 channels. The information of the contact scanning can be used for activating ABB-free@home® actuators or for recording status information.
The contact polling voltage is made available by the device itself.
Maximum cable length at a cable cross-section of 1.5 mm^2 < 100 m
For switching 8 independent 230 V~ loads.
No additional commissioning software is required.
Programming only with bus voltage applied via the web interface of the System Access Point.
Bus voltage: 24 V
Inputs: 8
Polling voltage: 35 V-
Outputs: 8 Normally Open contact, potential free
Suitable for: AC1 (Output voltage: 230 V~)
Rated current: 6 A, cos φ 0.8
Suitable for: AC3 (Output voltage: 230 V~)
Rated current: 6 A, cos φ 0.45
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64.5 mm
Module width (DIN-rail): 8 MW.

Switch actuator 4-gang

For switching 4 independent 127 V~/230 V~ loads.
Each contact has a manual operation function independent of auxiliary voltage for additionally displaying the contact setting.
The bus can be connected via enclosed terminal block.
Control element: relay control element.
Display elements: relay control element.
Programming only with bus voltage applied via the web interface of the System Access Point.
Power dissipation: 4 W
Bus voltage: 24 V
Outputs: 4
Suitable for: AC1 (Output voltage: 230 V~)
Rated current: 16 A, cos φ 0.8
Suitable for: AC3
Rated current: 8 A, cos φ 0.45
Protection class (device): IP20

Dimmer actuator

Dimming actuator 4-gang

Multi-channel universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps. For dimmable Retrofit-LEDs (LEDi).
Increasing the max. load via channel bridging possible.
The outputs can be switched parallel in any combination.
Outputs automatically recognize the connected load.
In addition, the operating mode can be selected manually.
Status indication of the channels via LED.
The bus can be connected via enclosed terminal block.
Display elements: outputs status indication via LED.
Programming only with bus voltage applied via the web interface of the System Access Point.
Rated voltage: 230 V~; 50/60 Hz
Bus voltage: 24 V
Outputs: 4 dimming channel
Suitable for: 230 V incandescent lamps and low-voltage halogen lamps with conventional transformers or electronic transformer.
Rated power: 10 - 315 W/VA
Suitable for: LEDi and energy-saving bulbs; typical
Rated power: 2 - 80 W/VA
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C
Dimensions: (L x W x D): 90 mm x 144 mm x 64 mm
Module width (DIN-rail): 8 MW.

Blind actuator

Blind actuator 4-gang

For controlling 4 independent blind or roller shutter drives.
The outputs are inversely blocked.
The bus can be connected via enclosed terminal block.
Programming only with bus voltage applied via the web interface of the System Access Point.
Power dissipation: 2 W
Bus voltage: 24 V
Outputs: 4
Suitable for: AC3 (Output voltage: 230 V~)
Rated current: 6 A, cos ϕ0.45
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C

For controlling thermoelectric actuating drives in heating/cooling systems.
The outputs are protected against short-circuit and overload.
The bus can be connected via enclosed terminal block.
Programming only with bus voltage applied via the web interface of the System Access Point.
Power dissipation: 2 W
Bus voltage: 24 V. Outputs: 6
Suitable for: resistive. Rated current: 160 mA
Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C.
Dimensions: (L x W x D): 90 mm x 72 mm x 64 mm.

Fan coil actuator

For controlling blower convectors. Supports 2-pipe and 4-pipe system for heating and cooling. The fan speed levels can be switched using a changeover or step switch function.
Three contacts for switching a three-stage fan.
Two contacts for activating the heating and cooling valves.
Supports 24V and 230V valves.
With two binary inputs for connecting dew-point and condensation contacts.
The scanning voltage is provided by the device.
The bus connection is provided via the enclosed bus terminal.
Programming only with bus voltage applied via the web interface of the System Access Point.
Bus voltage: 24 V. Inputs: 2
Polling voltage: 10 V-
Outputs: 3 Normally Open contact, potential free
Suitable for: AC3 (Output voltage: 230 V~)
Rated current: 6 A. Protection class (device): IP20
Temperature range (device): -5 °C to 45 °C.
Dimensions: (L x W x D): 90 mm x 108 mm x 64.5 mm.

KNX Push-button coupler - 2-gang with bus coupler

With integrated temperature sensor.
Support of KNX functions through innovative colour concept (yellow=lighting, blue=blind, orange=RTC, magenta=scene and white=neutral/no function assigned) or standard illumination red/green.
With middle position.
The bus can be connected via enclosed terminal block.
Control element: switch contacts top/bottom.
Display elements: 2 LED per rocker via separate communication object for status (Red/ Green/ OFF) or orientation light.
Connections: KNX-line - bus connection terminal.
Rated voltage: 24 V-, +5 V / -5 V.
Temperature range device: -5 °C to 45 °C.
To be installed with SR-1-85, SRL-1-85, SRD-1-85, SRB-1-85 and SRS-1-85 cover plates.

KNX Room thermostat with display

Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators.
For controlling commercially available valve drives.
With display of set-value temperature.
Master/slave configuration.
With base-load operation.
The bus can be connected via enclosed terminal block.
Class of temperature controller 1
Contribution to space heating energy efficiency 1,0%.
Control element: switch contacts.
Display elements: LCD showing operation mode and temperature.
Connections: KNX-line - bus connection terminal.
Rated voltage / current: 24 V- / 5 mA.
Temperature range device: -5 °C to 45 °C.
To be installed with CP-RTC-85 cover plates for RTC or CP-RTC-FC-85 cover plates for fan coil control.

KNX RTC with 5-gang universal input

Control element with room thermostat function for triggering the heating, ventilation and fan-coil actuators.
With universal input with:
- max. of 5 binary inputs.
- 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V
- 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226.
With display of set-value temperature.
Master/slave configuration. With base-load operation.
The bus can be connected via enclosed terminal block.
Class of temperature controller 1. Contribution to space heating energy efficiency 1,0%. Control element: switch contacts. Display elements: LCD showing operation mode and temperature. Connections: KNX-line - bus connection terminal. Rated voltage / current: 24 V- / 5 mA.
Inputs: 5. Polling voltage: binary inputs, presence and/ or window contact. Control/Signal outputs: 1, 0-10 V (passive). Temperature range device: -5 °C to 45 °C.
Tobe installed with CP-CO-85 cover plates.

KNX RTC with CO_2/moisture sensor

Control element with room temperature controller function and CO_2/moisture/air pressure sensor.
For activating heating, ventilation and fan coil actuators.
With universal input with:
- max. of 5 binary inputs.
- 4 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V.
- 2 binary inputs and 1 analogue input for activating sensors with external power supply 1-10 V/0-10 V and an external temperature sensor PT1000 / T6226.
With display of set-value temperature.

KNX 180° motion sensor

Movement detector with up to 4 channels.
Detection range: frontal: 6 m, lateral: 6 m.
Brightness limit value: 5 lux - 150 lux.
Detection angle: 180°.
Position for installation: vertical.
Mounting height: 1.1 m.
Temperature range (device): -5 °C to 45 °C.
To be installed with CP-MD-85 cover plates (mounting grid without claws included).

Bluetooth Low Energy (BLE) smart switch complete set. Wall transmitter, 2/4 channels.

Consisting of BLE smart switch insert 6716 UBT, 2gang rocker 6736 FoH-8xx for smart switches, 1gang future® linear cover frame, fixing plate and intermediate ring. Smarter light switch for wireless remote control of BLE radio devices. Compatible with Bluetooth ecosystems of following companies: aruba, Casambi, enlighted, Fulham, Helvar, Hytronik, Lumobi, Qeedji, SILVAIR, Blu2Light (Vossloh Schwabe), WISILICIA, XICATO Controls.

- For saving, calling up and dimming individual light scenes.
- Battery-free switch, no connection to mains voltage (230 V~) required.
- Particularly environmentally friendly, sustainable and maintenance-free; Transmission energy is generated when switching (energy harvesting).
- Maximum functional reliability through Bluetooth mesh technology.
- Combinable with the Busch-Jaeger switch ranges carat®, Busch-dynasty®, pure stainless steel, solo®, Busch-axcent® and future® linear.

Note! There might be limitations from transformer producers on how many dimmable LED bulbs can be connected behind one transformer.

Busch-rotary dimmer [1]). Flush-mounted, DALI, with internal power supply, tunable white

For DALI broadcast service (via central telegram). With integrated DALI power adaptor. For switching and dimming up to 64 DALI- devices like electronic ballasts and transformers with DALI-interface. With rotary control and ON/OFF push operation. For changing the colour temperature of "tunable white" lamps, which meet DALI Standard IEC 62386-209 (Device Type 8). Colour temperature can then be set between 2,700 K - 6,500 K. With electronic short-circuit protection. With electronic overload protection. Brightness power-on level and backround brightness level adjustable, buffered. With integrated LED illumination for orientation. Color of orientation light adjustable (18 presets and OFF). Up to 5 potentiometers are connectable in parallel. Up to 3 potentiometers are connectable in parallel in active mode.
Not suitable for combining with other DALI sensors or central units of other manufacturers.
DALI-voltage: 15,5 V=. Rated current: max. 75 mA. Power consumption: < 2,5 W. Number of DALI-units: 37 in case of one active power-potentiometer in case of three active power-potentiometer in parallel connection: 111
Active mode: the potentiometer is supporting the necessary control circuit for other DALI-devices.
Passive mode: the potentiometer is suitable as additional operation point. Max. DALI-cable length: 300 m (1,5 - 2,5 mm^2). Without cover plate. Rated voltage: 230 V~, +10 % / -10 %. Rated frequency: 50 Hz - 60 Hz
Protection class (Device): IP 20

[4] Recommendation: Please use loads and types of one producer.
[5] The dimmer interface is not standardised, it is the responsibility of the lamp manufacturers to list compatible products in their manufacturing information. Different installation situations can lead to different results. To clear up the problem, for example, it is recommended to carry out a local test of the selected lamps and dimmers. Please consult the lamp manufacturer for the LED dimmer recommended.
[6] A liability on the part of Busch-Jaeger for the compatibility of the allocated lamps and dimmers is therefore excluded.

Dimming actuator 4gang

Multi-channel universal dimming actuator for controlling LEDs, incandescent lamps, 230 V halogen lamps, low-voltage halogen lamps with conventional or electronic transformers, and dimmable energy-saving halogen lamps. For dimmable retrofit LED lamps (LEDi). Increasing the maximum load via channel bridging possible. The outputs can be switched parallel in any combination. Outputs automatically recognise the connected load. In addition, the operating mode can be selected manually. Status indication of the channels via LED.

Levit®
Go bright

The Levit® collection will perfectly fit into any modern home. Clear straight lines, the timeless shape of the square, the ideal proportions of the button and frame, and the striking contrast of the two-piece base. Levit®M extendends the range with cool metalic shades, which reflect the current trends in world design.

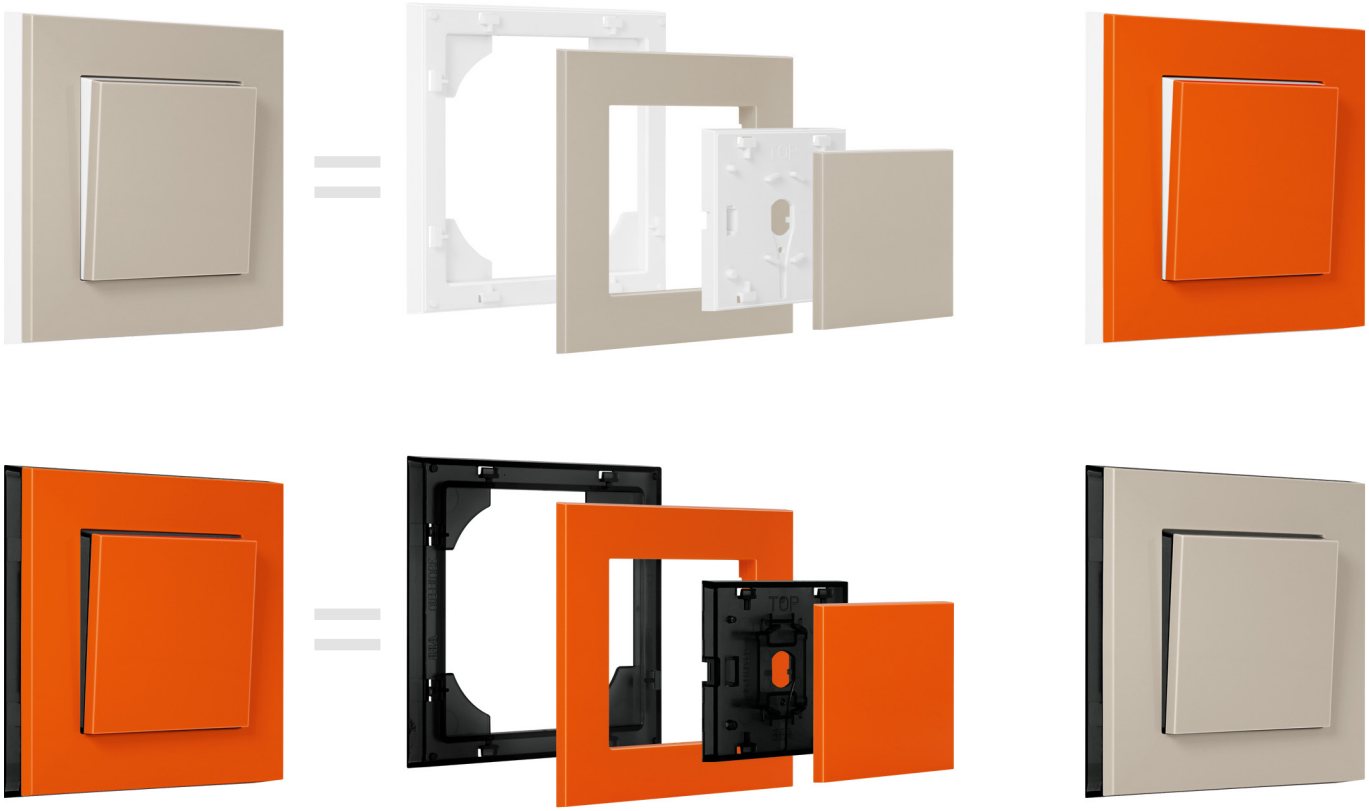
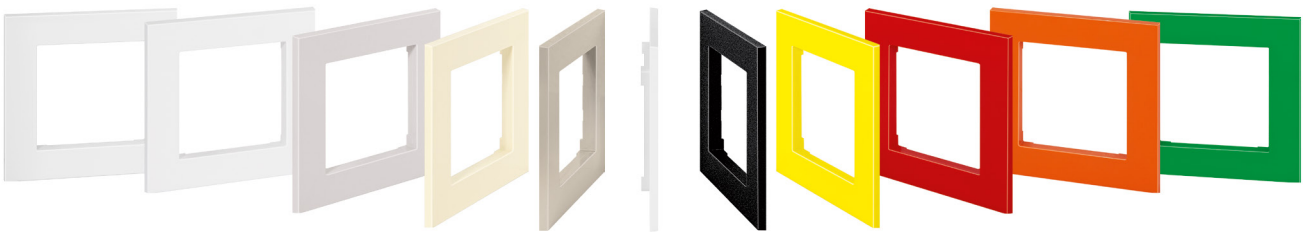
One collection – a million possibilities

The core idea behind the Levit® collection is flexibility and variation

The cover plates and cover frames for every insert consist of two pieces: a base and a removable upper covers. The product is therefore designed in such a way so that the upper covers can be changed as desired, meaning that new color combinations can be created beyond the standard solutions we provide.



The collection features removable cover frames in nine colors.
The set includes a special tool to easily dismantle the upper cover.



The LEGO principle goes for the frames too

Multi-gang frames are also designed using the module concept: the frame base is solid, but the number of upper covers depends on the number of gangs in the frame, and everything comes together like LEGO. This means that any frame with more than one gang can be built of multiple colors. The limit is your imagination!

Unusual socket outlets

Another interesting detail: the interior of the socket outlet will always be the same color as its base. This means that in Levit® socket outlets with a translucent base, you can see the reliable German insert produced by Busch-Jaeger, a member of the ABB group.
