

High Density Enhanced Category 5 Patch Panels

Features and Benefits

Molex Premise Networks Enhanced Category 5 High Density Patch Panels are ideal for ISP applications or installations where cabinet/rack space is at a premium. Providing 32 or 48 ports in 1U, these patch panels offer an integral rear cable management tray specifically designed for neat and easy cable dressing. The front of the panel has a protected labelling facility for clear port labelling.

Suitable for high speed data transmission, this panel was designed to meet the highest performance standards in the industry, utilising the PowerSum principle of measurement and testing.

Molex Premise Networks patented KATT IDC is dual colour coded allowing for 568A and 568B wiring and is terminable using industry standard tooling. Fixing kit, cable ties and installation instructions are included.
