Tap-off module *WINSTA®* IDC 5-pole

The *WINSTA®* IDC tap-off module with protection type IP20 is the pluggable solution for your application in control cabinets, on PCBs or for lighting connections. Our pluggable installation connectors with spring pressure connection technology function without screw connections. They allow resource-efficient, error-free installation in numerous applications.

The color coding and mechanical coding of the pluggable installation connector ensure error-free installation of the individual components – including protection against mismating. The pluggable installation connector is protected against ingress by solid objects in accordance with protection type IP20. I coding in blue is used to identify *WINSTA®* IDC pluggable installation connectors, which are used above all in automation of buildings for activating lighting. This pluggable installation connector is used for electrical currents up to 25 A. Thus the product is also suitable for high power loads.

Push-in CAGE CLAMP® spring pressure connection technology – pluggable installation instead of laborious screw connections!

The WINSTA® Pluggable Connection System is perfectly tailored to the very strict requirements of building installation. It makes electrical installation pluggable, and therefore more efficient, even more reliable, and error-free. Use of this pre-assembled system reduces assembly times and errors during installation at the construction site. Enjoy the benefits of the pluggable version of our maintenance-free spring pressure connection technology too! Plan your installation with *WINSTA®* IDC pluggable installation connectors with protection against mismating from WAGO.

- pluggable installation connectors with protection against mismating
- products perfectly tailored to your requirements guarantee safe use
- with I coding for controlling light (DALI standard)
- custom-engineered solutions
- convenient installation and commissioning
