771-9973/206-805

Item no. 771-9973/206-805

**WINSTA® MIDI** > pre-assembled connecting cable; Eca;  
Plug/open-ended; 3-pole; Cod. S; H05VV-F 3 x 1.5 mm<sup>2</sup>; 8 m;  
1,50 mm<sup>2</sup>; brown

Color:

## Cable assembly **WINSTA® MIDI S coding**

The **WINSTA® MIDI** cable assembly S coding ensures rapid, correct installation. On PCBs, in control cabinets or for connecting lights – pluggable installation connectors from WAGO allow you to make connections according to an enormous variety of requirements in no time flat.

The coding options reduce installation errors, allowing fast, secure wiring of all components. The pluggable installation connector is protected in accordance with protection type IP20. That results in the fact that users' fingers will never come into contact with electrified elements. **WINSTA® MIDI** pluggable installation connectors with S coding in brown are mainly used in AC applications. The **WINSTA® MIDI** Pluggable Connection System with Push-in **CAGE CLAMP®** spring pressure connection technology facilitates safe electrification. Thanks to the integrated test slot, it is possible to check connections even when they are plugged in. This saves time, labor, and money. According to the European CPR, the fire class of the cables used in construction is critical for building safety, too. For buildings with medium-level safety requirements, cable assemblies with fire class E are suitable.

**Fast, secure pluggable connections – cable assemblies from WAGO**

The cable is pre-assembled with a plug and a free end. The WINSTA® Pluggable Connection System is ideally tailored to the strict requirements of building installation. It makes electrical installation pluggable, and consequently faster, more reliable, and error-free. Using this pre-assembled system decreases time spent on assembly and installation errors at the construction site. Now you can also lower installation costs without compromising safety and quality. The WINSTA® MIDI pluggable installation connector with marking reduces the need for servicing and prevents unnecessary downtime.

- protection against mismating eliminates errors
- simple circuits
- with S coding for AC applications of distributed components
- ready for immediate use
- convenient installation and commissioning
