Cable assembly **WINSTA® MIDI** with protection against mismatching

Use effective pluggable connections instead of laborious screw connections: With the **WINSTA® MIDI** cable assembly I coding. WAGO pluggable installation connectors can be used when specifications repeat or are planned on a specified grid, for example for installing grid lighting or flush-mount lighting.

The coding options reduce installation errors, allowing fast, secure wiring of all components. The pluggable installation connector offers touch-proof protection with live components in accordance with protection type IP20. Regulated lighting equipment, as used in the DALI standard, for example, is the main use of **WINSTA® MIDI** pluggable installation connectors with I coding. The **WINSTA® MIDI** Pluggable Connection System with Push-in **CAGE CLAMP®** spring pressure connection technology facilitates exemplary electrification. Thanks to the integrated test slot, connections can be checked even when they are plugged in. This saves time, labor, and money. This product meets all the mandatory safety requirements of fire class E; as a result it can be used in domains where fire safety is relevant.

Pluggable connections instead of screw connections – cable assemblies from WAGO

The cable is pre-assembled with a plug and a free end. WINSTA® is the pluggable connection system that is perfectly tailored to the strict requirements of electrical installation. It offers fast, secure and, above all, error-free installation of components and cables. Choose quality and durability – the WINSTA® MIDI pluggable installation connector with protection type IP20 from WAGO makes the installation of electrical components noticeably easier.

- effective protection against mismatching
