

Item no. 771-9973/206-705

**WINSTA® MIDI** > pre-assembled connecting cable; Eca;  
 Plug/open-ended; 3-pole; Cod. S; H05VV-F 3 x 1.5 mm²; 7 m;  
 1,50 mm²; brown

**Cable assembly WINSTA® MIDI S coding**

The WINSTA® MIDI cable assembly 3-pole allows installation of solid and fine-stranded conductors. On PCBs, in control cabinets or for connecting lights – pluggable installation connectors from WAGO allow you to establish connections according to a huge variety of requirements in no time flat.

For greater protection in electrical installations, the pluggable installation connector is equipped with mechanical protection against mismating. The pluggable installation connector is protected in accordance with protection type IP20. This means that users' fingers will never come into contact with live contact elements. Light switches and outlets can be integrated into the system with the help of WINSTA® MIDI pluggable installation connectors with S coding in brown. WINSTA® MIDI with Push-in CAGE CLAMP® spring pressure connection technology is used in a broad range of individual products you can use for quick, easy and maximally flexible installation. This product meets all the mandatory fire protection requirements of fire class E; therefore it can be used in areas where fire safety is relevant.

**Fast, error-free assembly thanks to cable assemblies from WAGO**

The cable is pre-assembled with a plug and a free end. The WINSTA® Pluggable Connection System is ideally tailored to the strict requirements of building installation. It makes electrical installation pluggable, and therefore more efficient, more reliable, and error-free. Using this pre-assembled system decreases time spent on assembly and installation errors at the construction site. Choose durability and quality – the WINSTA® MDI pluggable installation connector with protection against mismatching from WAGO makes the installation of electrical components noticeably easier.

- effective protection against mismatching
- simple circuits
- with S coding for use in components such as motors or frequency converters
- ready for immediate use
- quick replacement of defective units during ongoing operation
