Item no. 771-9995/207-502

WINSTA® MIDI > pre-assembled connecting cable; Eca;
 Plug/open-ended; 5-pole; Cod. A; H05VV-F 5G 2.5 mm²; 5 m;
 2,50 mm²; white

Color:

Cable assembly **WINSTA® MIDI** rated current 20 A

The **WINSTA® MIDI** cable assembly rated current 20 A is the pluggable solution for your application in control cabinets, on PCBs or for lighting connections. Whether on PCBs, in control cabinets or for connecting lights – pluggable installation connectors from **WAGO** allow you to establish connections according to a huge variety of requirements in next to no time.

The mechanical coding and color coding of the pluggable installation connector ensure error-free installation of the individual components – including protection against mismatching. The pluggable installation connector is protected in accordance with protection type IP20. This means that users' fingers will never come into contact with electrified elements. Standard mains applications for almost any domain of use can be implemented with **WINSTA® MIDI** pluggable installation connectors with A coding. Important parameters in the selection of a pluggable installation connector are the rated current and voltage: They provide information about possible domains of use and applications. This product has a current rating of 20 A – so it is suitable for high power loads. The **WINSTA® MIDI** Pluggable Connection System with Push-in **CAGE CLAMP®** spring pressure connection technology facilitates precise electrification. Due to the integrated test slot, it is possible to check connections even when they are plugged in. This saves time, labor, and money. To prevent accidental

disconnection of the pluggable connectors, a mechanism is available for a locking lever. This can either be installed at the factory or retrofitted at any time, for instance on "flying leads" for cable assemblies. Of course, the safety of buildings must always be ensured, even after the electrical installation has been performed. The required safety requirements in connection with EU CPR are fully satisfied by this product through fire class E.

Pluggable connections instead of screw connections – cable assemblies from WAGO

The cable assembly is equipped with a plug and a free end. WINSTA® is the pluggable connection system that is perfectly tailored to the strict requirements of electrical installation. It offers error-free installation of cables and components, quickly and reliably. Choose quality and durability – the WINSTA® MDI pluggable installation connector with protection type IP20 from WAGO makes the electrical installation of electrical components significantly easier.

- effective protection against mismatching
- simple circuits
- with Acoding for a large number of applications
- exact dimensions
- convenient installation and commissioning
