

**Features and Benefits**

Molex Premise Networks Category 6 FTP Patch Panel is part of the PowerCat 6 FTP product range that has been designed to support a growing requirement for shielded cabling systems.

The PowerCat 6 FTP Patch Panel features the FTP DataGate Plus™ Category 6 connector. This superior connector provides 360° shielded protection by utilising a two piece tin/nickel plated brass can that encloses the RJ45 IDC. The FTP DataGate Plus connector includes a unique integral shutter that not only protects it from dust and contaminants, but the ingenious spring-loaded design also ejects improperly seated patch cords. The FTP DataGate Plus connector is dual colour coded for either 568A or 568B wiring schedules and is RJ11 compatible.

The 24 Port (1U) PowerCat 6 FTP Patch Panel is supplied with a rear cable management tray for cable strain relief and neat cable dressing. Port numbering is provided on the front and rear of the panel and individual ports may be colour coded using connector icon labels for site-specific network administration.

Suitable for high-speed data transmission, the FTP DataGate Plus Category 6 connector has been designed to exceed the highest electrical performance standards in the industry and has been independently tested and verified by ETL SEMKO for Category 6 component compliance. The FTP DataGate Plus connector is also backwards compatible with FTP CSE systems.

Molex recommend that the full range of PowerCat 6 FTP products are used in a system to maximise cabling performance. Utilising F/UTP cable part no CAA-00252 the System has been independently verified by Intertek ETL SEMKO as compliant with ISO/IEC 24570 and TIA/EIA TSB-155 standards for the support of 10G BASE-T Channels and Permanent Links.
