

SPW-150

INDOOR SIREN WITH EMERGENCY POWER SUPPLY

The **SPW-150** siren is used for acoustic signalling of alarm events within a protected facility. The in-built emergency power supply ensures that **SPW-150** is able to indicate alarms even when it is cut off from an alarm control panel.

- acoustic alarm: piezoelectric converter
- protection against tampering (opening and removing from a surface)
- emergency power supply by means of a 9V battery

TECHNICAL DATA

Supply voltage	12 V DC
Operating temperature range	-10...+55°C
Max. current consumption	330 mA
Weight	162 g
The intensity of sound	to 120 dB
Maximum humidity	93±3%
Standby current consumption	10 µA
Dimensions	130 x 130 x 40 mm
Environmental class according to EN50130-5	II
Complied with standards	EN50130-4, EN50130-5
Emergency power supply	bateria alkaliczna 6LR61 9V
