

# CA 3220 POWER ANALYSER

**Measurement of all power values** 

- Measurement of very low and very high currents
- > Electric motor maintenance
- Analysis of phase shift and harmonics

# **CA 8220**

The **CA 8220** wattmeter is designed for companies' testing and maintenance teams. The broad range of measurements which it provides also makes it ideal for technical and technological education.

**Extremely easy** to handle, it can be used to test electrical installations, particularly when they include systems based on power electronics. Geared firmly towards the world of electrical engineering and the testing of rotating machines, the **CA 8220** wattmeter is designed for companies' testing and maintenance teams.

With its liquid crystal segment display, the ergonomics of this compact, shockproof instrument's user interface make it intuitive, simple and comfortable to use. It automatically recognizes the type of sensor connected.

The **CA 8220** is suitable for use in the field or on a benchtop thanks to its retractable stand. It can be used to obtain a snapshot of the main characteristics of a single-phase or balanced three-phase network.

In addition, it measures all the quantities required to test rotating machines (rotation speed/temperature).

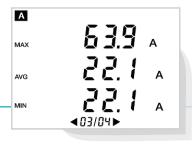

Offering significant accuracy, this instrument covers measurements from a few milli-amperes to several kilo-amperes thanks to a wide choice of sensors.

## **MAIN MEASUREMENTS**

## > Voltage and current:

As well as measuring the TRMS AC+DC value at the half-period, peak values and THD, this instrument also offers instant display of the waveform.

#### > Inrush current:

Also called the starting current, the Inrush corresponds to the maximum input current drawn by an electrical

device when it is powered up. For example, when they are first switched on, AC electric motors may draw several times their normal current at full load.

### > Comprehensive power analysis:

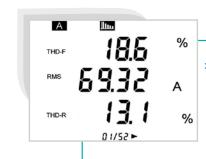

All the measurements necessary for comprehensive power and energy analysis on both single-phase and three-phase systems.

W 17.84 kW 12.26 kVAR

## > Energy values:

The total or partial energy metering is performed on all 4 quadrants.

## > Harmonics up to the 50th order:

The CA 8220 can be used to measure up to the 50th order of the different values. In addition, the expert mode allows you to determine the direction of the harmonics.

## > Rotation speed:

For predictive maintenance, it is crucial to check the rotation speed of rotating machines regularly. As an all-in-one instrument, the CA 8220 meets this requirement simply and effectively.

2508 RPM

# > Temperature:

Today's motors and rotating machines are equipped with temperature probes which are easily accessible on a terminal block.

The internal temperature of the motor can be measured directly by connecting the CA 8220 to this terminal block.

2 1.8 °c

## COMPOSITION

**P01160620:** one CA 8220 instrument supplied with 6 fitted AA batteries, 1 red banana lead (straight-straight), 1 black banana lead (straight-straight), 2 x 4 mm test probes (1 red, 1 black), 2 crocodile clamps (1 red, 1 black), 1 optical USB cable and Power Analyzer Transfer software available for download.

## **TO ORDER**

CA 8220 analyser alone \_\_\_\_\_P01160620

## **ACCESSORIES**

4 mm red and black test probes.	P01295454Z
Red and black crocodile clips	P01295457Z
• 4 mm red and black banana/banana leads	P01295451Z
Pince MN93A BK clamp	P01120434
MN93 BK clamp	P01120425
AmpFlex A193 450 mm BK	P01120526
AmpFlex A193 800 mm BK	P01120531
PAC93 BK clamp	P01120079
• C193 BK clamp	P01120323

CA 1711 no-contact RPM sensor for measuring rotation speeds (6 to 120,000 RPM)

Mains adapter	P01160640
E3N clamp	P01120043A
E3N adapter	P01102081
E3N power supply	P01120047
RPM sensor	P01102082
Optical/USB cable	HX0056-Z
RS232/USB adapter	HX0055B
DataView® processing software	P01102095
Carrying bag No 5	P01298049
