## SURFACE SENSING THERMOSTAT, ELECTRONIC

nVent RAYCHEM AT-TS thermostats provide temperature control in safe area. The temperature set point can be checked through a window in the lid. LED's are providing an indication when cables are energized (Heating ON) or when the temperature sensor is defect (sensor break or sensor short-circuit).

The temperature sensor has a length of 3 meter and can be shortened for ambient sensing operating. Direct connection of the heating cable is possible. Connection kits need to be ordered separately. The thermostat is available in 2 temperature ranges.
