

## EM PRO EZ 220–240 V 50/60 Hz

### Description:

Low profile emergency lighting modules with DALI interface and automatic testing facility to cover 1 hour and 3 hour duration operating from NiCd and NiMh batteries. All modules incorporate five pole technology for use with HF ballasts and have preheat starting and permanent cathode heating during the emergency operation. Boost starting for 55 seconds at higher power levels is provided for all lamps to ensure rapid warm up, optimised lamp life and improved initial visibility during an emergency operation. Power control technology ensures maximum emergency ballast lumen factors for all lamps on a given module.

DALI interface terminals are provided to allow control and monitoring via a separate controller.

When the EM PRO EZ operates in Selftest mode testing is being conducted on a default weekly functional and 13 weeks duration basis with adaptive duration testing feature to minimise risk.

Fitted with the unique EZ easy addressing feature which uses the LED to indicate the DALI address during commissioning.

### Features:

#### Module

- DALI interface for control and reporting
- Low profile cross section (21 mm x 30 mm)
- 5 pole technology
- For use with HF ballasts
- NiCd or NiMh battery options
- 10–15 hour accu recharge time
- 3 hour and 1 hour operation
- High and standard BLF for 1 hour versions
- Bi-colour LED to indicate status
- AC operation of lamps
- Pre-heating of cathodes during emergency operation
- Permanent cathode heating during emergency operation
- Boost starting facility for all lamps
- Rest mode function
- Electronic multilevel charging system
- Deep discharge protection
- Testing
  - Battery condition
  - Lamp condition
  - Charge condition
- Patented EZ easy addressing feature using LED
