

DECLARATION OF CONFORMITY REACH (Reduction, Evaluation, Authorization Chemical Products)

According to directives No. 1907/2006/CEE and further updates

Dear Customer,

PM PLASTIC MATERIALS srl, as a transformer of plastic materials, does not have any obligation of registration.

Nowadays polymers (plastic materials) used by **PM PLASTIC MATERIALS srl** are not required to be registered in the REACH (article No. 2 §9 page 18/19 of the regulation)

According to the above-mentioned regulation, these materials, due to their features, are not involved in the obligations of the article 33 "Obligation to inform about the presence of substances in the products" as the part of the substances deemed as dangerous account for less than 0,1% of the total weight of the product.

PM Plastic Materials srl declares that does not produce any chemical substance but makes use of compounds as end user, adopts all measures required to deal with the risks related to dangerous substances that are mentioned in the Safety Data Sheets of the suppliers. Furthermore **PM PLASTIC MATERIALS srl** verifies that all his suppliers are respecting the regulation in force and controls the substances used in the products in order to detect and inform you (according to the article 33 of the REACH) about the possible presence of substance that will be classified as SVHC (Substances of Very High Concern) and therefore included into the "Candidate List" (encl. No. XIV of REACH regulation).

None of the 219 substances listed in the Candidate List (<http://echa.europa.eu/web/guest/candidate-list-table> - updated on 12/10/2021) has been found in the raw materials that PM uses.

For further requests, we kindly ask you to send an e-mail to info@pmplasticmaterials.it

Almenno San Bartolomeo, October the 12th 2021

Best regards

PM Plastic Materials
