

9.5W 15000h BX

Built-in motion detector

The lamps combine the features of a daylight sensor and motion detector. They only turn on and consume electricity when required. The lamp is activated when the surrounding light level falls below 10 lux. When motion is detected, it turns on for 40 seconds at a time. The eco-friendly packages indicate the corresponding incandescent bulb, making the choice easier for consumers. Technical specifications are clearly presented. The colour temperatures are warm white and cool white (2700 K and 4000 K).

Opal classic LED lamp with daylight sensor and motion detector 9.5W 2700K E27 1055lm 15000h 60x120mm, cardboard packing. Supply frequency ~50/60Hz.
