

# INDLINE IP23 XXL

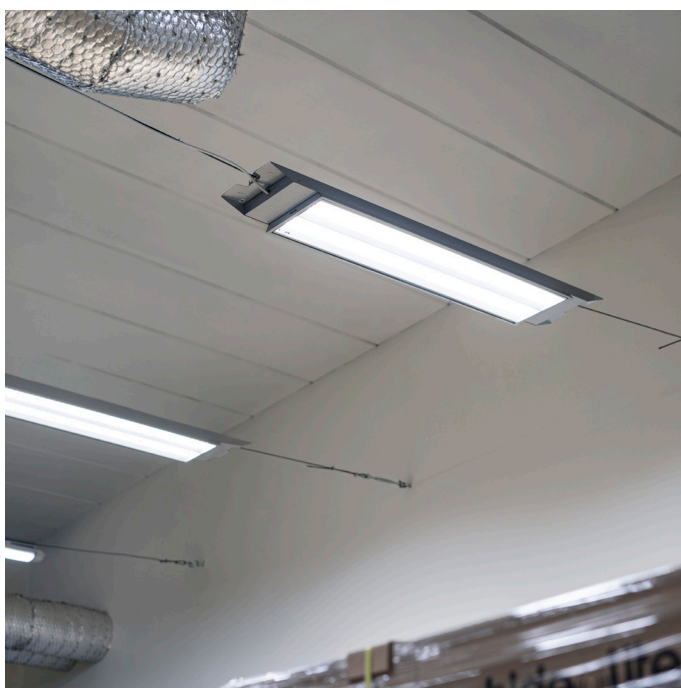

With its market leading efficiency and installation friendliness, we present our latest innovation in the Indline family, the Indline XXL IP23 boss. A highly efficient fluorescent tube replacement which, thanks to its high lumen output, gives opportunities for lighting up large premises with fewer luminaires. Indline IP23 XXL is an industrial luminaire in galvanised steel plate that meets industry's need for flexibility and durability. Well-planned design enabling replacement of both LED and driver. Control the lighting via DALI/Push or On/Off. On/Off can be adjusted to a lower lumen output via DIP-switch Power. Several installation possibilities: luminaire rail, against the ceiling, wall or suspended by wires. Protective grid and fixing bracket KBA and KBB are available as accessories. Industrial driver or surge voltage protection can be obtained as options on request.

The Indline family of luminaires now consists of many different sizes and versions: Indline IP23, Indline IP23 Sport and Indline IP23 Sport Grid. Outstanding fluorescent tube replacements for warehouses, industry, sports facilities and other large spaces.

- **Highly efficient fluorescent tube replacement – save energy and use fewer luminaires in your installation**
- **Installation and connection in end caps without open the luminaire, through wiring as standard**
- **Protective grid and fixing bracket Canalis KBA and KBB are available as accessories**
- **Several installation possibilities: luminaire rail, against the ceiling, wall or suspended by wires**

**SAVE TIME AND  
MONEY WITH FEWER  
LUMINAIRES IN YOUR  
INSTALLATION**

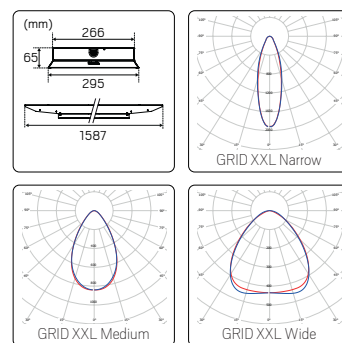

Replaceable LED module and driver
