## Electronic Switch Actuator Module, 2-fold, 24 V

### ES/M 2.24.1, 2CDG 110 014 R0011

The 2-fold Electronic Switch Actuator Module is snapped into any module slot of the Room Controller Basis Device. Using two semiconductor outputs, it switches two resistive loads such as electrothermal valve drives for heating control. The outputs are noise-free and wear-resistant. The nominal switching voltage is 12 V or 24 V. The internal voltage is supplied via the Room Controller Basis Device. Contact is automatically established when the modules are snapped in place.

#### Note

For a detailed description of the application program see „Switch Actuator Modules for the Room Controller, SA/M, ES/M“ product manual. It is available free-of-charge at [www.abb.com/knx](http://www.abb.com/knx).

The ETS and the current version of the device application program are required for programming.

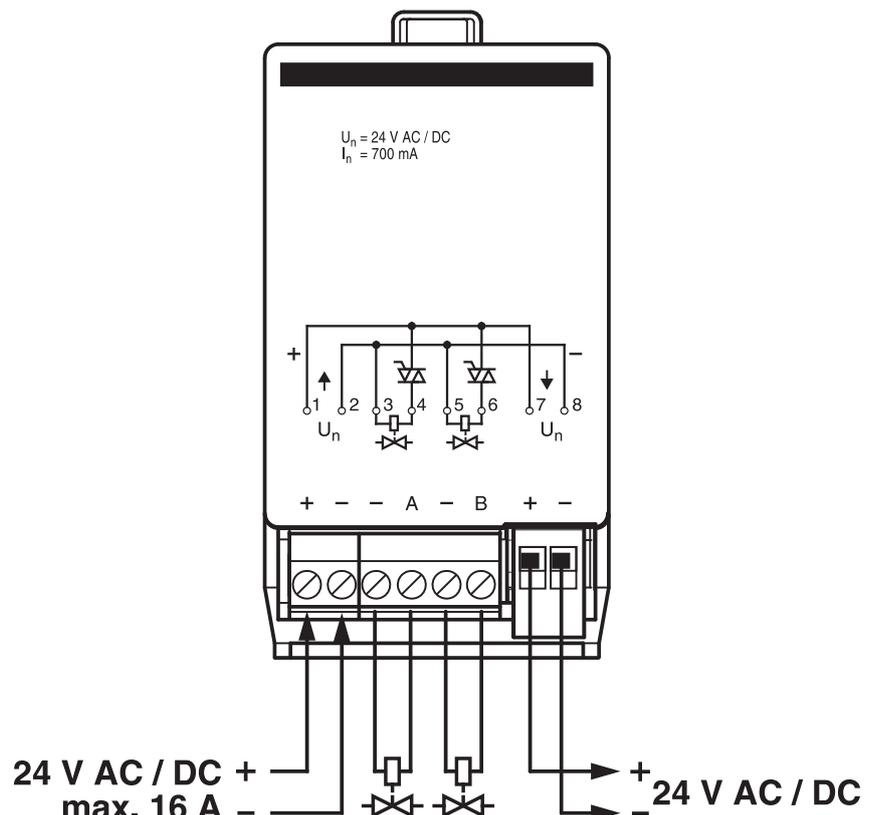

The current version of the application program is available for download on the Internet at [www.abb.com/knx](http://www.abb.com/knx). After import it is available in the ETS under *ABB/ Room automation, Room Controller*.

The device does not support the closing function of a KNX device in the ETS. If you inhibit access to all devices of the project with a BCU code, it has no effect on this device. Data can still be read and programmed.

#### Important

Programming is possible only when the supply voltage is applied.
