

## Devices are monitored

### EIB Monitoring Unit of ABB STOTZ-KONTAKT

The EIB Monitoring Unit EUB/S 1.1 enables monitoring of up to 100 bus members in EIB / KNX systems. The devices are monitored to ensure their presence and minimum functionality.

The monitoring occurs by four different monitoring modes. Furthermore, devices can be combined in up to five groups for monitoring purposes.

The device is specially suited for monitoring facilities with security relevant features, e.g.:

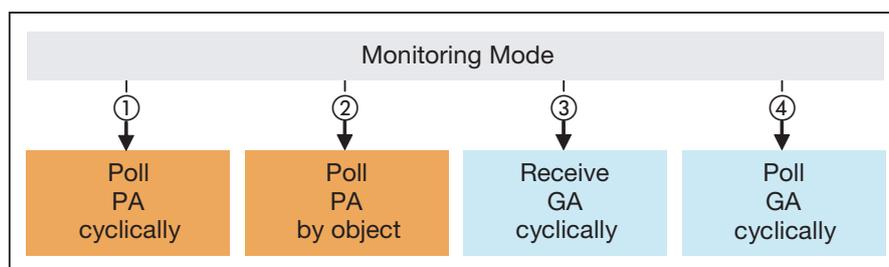

- Hospitals
- Industrial Buildings
- Banks
- Hotels
- Schools
- ...

## The Monitoring Unit

### Four different monitoring modes

Devices can be monitored via the physical address (PA) or via a group address telegram (GA).

Overall there are four monitoring modes available:
