

## 4.5W 15000h BX

Dimmable clear decorative lamp – warm tone

Filament lamps are suitable for replacing clear incandescent bulbs and halogen lamps. The lamps emit plenty of light towards the base. This is very important for luminaires on which the base of the lamp points downward. The lamps emit warm yellow (2200 K) light and, when combined with the elegant cord, look impressive even without a lampshade. Models that are dimmable with LED dimmers can be recognised by the DIM symbol on the package. The eco-friendly cardboard packages are colour-coded. The colour indicates the corresponding incandescent bulb, making the choice simpler for the consumer. Technical specifications are also clearly presented.

Clear candle dimmable filament LED lamp 4.5W 2200K E14 400lm 15000h 35x97mm, full glass, cardboard packing. Supply frequency ~50/60Hz.
