

# IP68BOX outdoor installation set

Unpack – Install – Ready!

# INSTALLATION SET

## Unpack – Install – Ready!

- Delivery as a complete package – ready to install
- Fast processing
- Fast initial operation
- IP68

The IP68BOX outdoor cable junction box is filled with a 2-component PUR cast resin. This protects electrical connections in especially damp environments, for example underground or even under water. Vibrations in the ground caused by traffic have no effect on the connection, which is designed for long-term operation. In addition to the cable junction box and the cast resin, the installation set contains a connection terminal for flexible earth leads and 3 cable glands.

Can be buried immediately after filling and then energised.

IP68  
WATER PROOF

Hardens after 60 minutes, and for use under water.

### IP68BOX outdoor installation set

- Cable junction box with 2-component PUR cast resin
- Max. 6 cables
- Nom. insulation voltage  $U_i$ : 690 V

<b>Length × Width × Depth</b>	<b>95 × 95 × 55 mm</b>
M20 / M25 insertion	8 entries in 4 directions
M25 cable gland	3
with clamp range Ø	11-17 mm
Protection class	IP68
Halogen-free	yes
<b>Art. No.</b>	<b>2521</b>
Packaging inner/dispatch	1 / 10

Follow the installation instructions!
