Cobra Nødlys Kit inkl. batteri

El nr	14 651 05
Article nr	391506
EAN	7090015370253

Tekniske data

Spenning	230VAC 50/60Hz
Power factor (PF)	0,90
Mains current	16mA - 19mA
Mains power	4W
Output voltage	85VDC
Battery charge voltage	5,5V-9V
Battery charge current	200mA (Max)
Charge period	24 timer
Battery duration	3 hour @ 3W
Levetid	40 000 timer
Driftstemperatur	-0°C <ta< 50°C

LED Driver

Type	Nødlys
Driftsstrøm	

Beskyttelse

Isolasjonsklasse	Klasse II
IP-grad	IP20

Materialer og overflater

Armaturhus	Plastic
Farge	Hvit

Energi og godkjenning

Inneholder lyskilde med Energiklasse	
Godkjenning	CE, Semko, RoHS
EMC	EN 55015, EN 61547
Safety standard	EN 50172, EN 61347-2-7, EN 61347-2-13, IEC 62034, BS5266

Montering/Tilkobling

Montering	Utenpåliggende
Kobling	Hurtigklemmer

Dimensjoner (mm)

Lengde (L)	150 mm
Bredde (W)	53,5 mm
Høyde (H)	30,5 mm
Vekt	0,53 kgs

Forpakning

Kartong Dimensjon	375x280x260 mm
Antall/Kartong	12 stk
Kartong Vekt	7,30 kgs

FDV

Cobra Nødlys Kit inkl. batteri

Self-testing feature

Carrying out routine test on emergency lighting and holding records of the test result is required by the law (IEC62034, BS5266 and EN50172). 391506 has a internal clock, programmed to interrupt the permanent mains supply at pre-determined intervals to perform the requested routine testing: 3min functional test every month, and 1h (3W) function test every 6 months, and 3h (3W) function test every 12 months.

- ❑ Self-test starts after the luminaire are connected to mains for continued 24 hours
- ❑ Auto-commissioning, save manpower and maintenance
- ❑ Permanently monitors battery and charge condition
- ❑ Dual failure indication: failures are clearly identified on the luminaire by red LED and buzzer
- ❑ MCU programmed test schedule: 3mm @ every month, 1h (3W) @ 6 months, 3h (3W) @ 12 months
- ❑ Automatic delayed test in case of power failure at programmed testing period

Status	Buzzer beep & LED flash mode	Bisual indication	Buzzer
Battery failure	Red LED slowly flashes once in 3 seconds; buzzer beeps 10 seconds every hour.		
LED lamp failure	Red LED rapidly flashes twice in 3 seconds buzzer beeps 10 seconds every hour.		
Emergency LED driver failure	Red LED rapidly flashes 3 times in 3 seconds buzzer beeps 10 seconds every hour.		
Healthy condition	Green LED is constantly on		
Battery charge	Green LED slowly flashes once every second		
Battery discharge	/	/	
Monthly test	Green LED slowly flashes once in 3 seconds		
6 month test	Green LED flashes twice in 3 seconds		
12 month test	Green LED quickly flashes 3 times in 3 seconds		

Reset Function

There is a RESET button on 391506 which is designed to randomly initiate the self-testing program after commissioning. It can also remove 'failure indication' after replacing the failed component.

Three ways to achieve:

- Short push (<2s): goes to monthly test mode and can clear all failure indications, except the one caused by low battery.
- Long push (<5s): buzzer beeps twice and battery start charging for 24h, then goes to 12-month test mode. All indications are cleared after test.
- Long push (>10s): buzzer beeps three times, then goes to 12-month test mode. All indications are cleared after test.
