# Eaton 191633

# Catalog Number: 191633

Eaton Moeller series NZM - Molded Case Circuit Breaker. NZM2 PXR20 circuit breaker, 220A, 3p, screw terminal, N, 2

# General specifications

Photo is representative

**Product Name** Catalog Number

Eaton Moeller series NZM molded case 191633

circuit breaker electronic

Model Code NZMN2-MX220

**EAN** Product Length/Depth

4015081921454 190 mm

**Product Height Product Width** 160 mm 115 mm

**Product Weight** Compliances 2.3 kg

Certifications

IEC/EN 60947

**IEC** 

RoHS conform

# defaultTaxonomyAttributeLabel

#### Type

Circuit breaker

#### Special features

IEC/EN 60947-2 with

characteristic conforming to

IEC/EN 60947-4-1 with

phase failure sensitivity

The circuit-breaker fulfills all

requirements for AC-3

switching category.

R.m.s. value measurement

and "thermal memory"

Adjustable time delay setting

to overcome current peaks tr

at 6 x Ir also infinity (without

overload releases)

All AC-3 rating data applies

to direct switching by the

circuit-breaker under normal

operating conditions. If, for

example, a contactor takes

over AC-3 switching under

normal operating conditions,

the full rated uninterrupted

current applies to the circuit-

breaker, In = Iu.

Maximum back-up fuse, if

the expected short-circuit

currents at the installation

location exceed the

switching capacity of the

circuit breaker (Rated short-

circuit breaking capacity Icn)

Rated current = rated

uninterrupted current: 220 A

# Application

Use in unearthed supply systems at 690 V

### Amperage Rating

220 A

# Voltage rating

690 V - 690 V

# Technical data sheets

eaton-nzm-technical-information-sheet

#### NZM2

# 10.10 Temperature rise

The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices.

#### 10.11 Short-circuit rating

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

# 10.12 Electromagnetic compatibility

Is the panel builder's responsibility. The specifications for the switchgear must be observed.

#### 10.13 Mechanical function

The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.

#### 10.2.2 Corrosion resistance

Meets the product standard's requirements.

# 10.2.3.1 Verification of thermal stability of enclosures

Meets the product standard's requirements.

# 10.2.3.2 Verification of resistance of insulating materials to normal heat

Meets the product standard's requirements.

# 10.2.3.3 Resist. of insul. mat. to abnormal heat/fire by internal elect. effects

Meets the product standard's requirements.

#### 10.2.4 Resistance to ultra-violet (UV) radiation

Meets the product standard's requirements.

### 10.2.5 Lifting

Does not apply, since the entire switchgear needs to be evaluated.

#### 10.2.6 Mechanical impact

Does not apply, since the entire switchgear needs to be evaluated.

## 10.2.7 Inscriptions

Meets the product standard's requirements.

# 10.3 Degree of protection of assemblies

Does not apply, since the entire switchgear needs to be evaluated.

# 10.4 Clearances and creepage distances

Meets the product standard's requirements.

# 10.5 Protection against electric shock

Does not apply, since the entire switchgear needs to be evaluated.

# 10.6 Incorporation of switching devices and components

Does not apply, since the entire switchgear needs to be evaluated.

#### 10.7 Internal electrical circuits and connections

Is the panel builder's responsibility.

#### 10.8 Connections for external conductors

Is the panel builder's responsibility.

# 10.9.2 Power-frequency electric strength

Is the panel builder's responsibility.

# 10.9.3 Impulse withstand voltage

Is the panel builder's responsibility.

# 10.9.4 Testing of enclosures made of insulating material

Is the panel builder's responsibility.

#### Fitted with:

Thermal protection

#### Pollution degree

3

# Mounting Method

Built-in device fixed built-in technique

Fixed

# Climatic proofing

Damp heat, cyclic, to IEC 60068-2-30

Damp heat, constant, to IEC 60068-2-78

# Equipment heat dissipation, current-dependent

39.93 W

# Utilization category

A (IEC/EN 60947-2)

#### Isolation

300 V AC (between the auxiliary contacts)

500 V AC (between auxiliary contacts and main contacts)

# Ambient operating temperature - max
