

SHARP POST ASYM

Sharp Post Asym is a post luminaire with a sharp design to light up your outdoor areas. With its asymmetrical light distribution, Sharp Post can direct the light to illuminate a pathway. Perfect for smaller cycle parking areas and cycle paths, as well as car parking at large shopping centres and open areas; posts between 4-6m apart. Replaceable LED and driver. Complies with requirements for glare and colour rendering for pedestrian and cycle paths. Adjustable lumen output and selectable colour temperature via DIP-switch. Impact resistant (IK10) with powder coating to withstand our Nordic climate. Light can be directed thanks to the adjustable luminaire head. Easily installed with flexible post bracket for posts of 48mm or 60mm diameter. Comes with 5m of pre-mounted rubber cable for easy connection in the post.

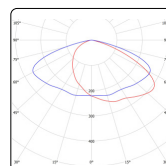

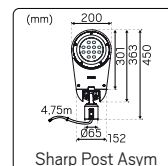

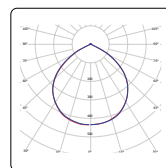

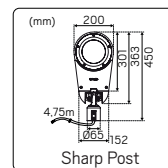

- Complies with requirements for glare and colour rendering for pedestrian and cycle paths
- Adjustable lumen output and selectable colour temperature via DIP-switch
- IK10 – impact resistant with powder coating to withstand our Nordic climate
- Suitable for posts of 48mm or 60mm diameter
