

OPTIC SPOT

Here is our new, discrete, compact and well glare-protected spotlight with bracket for recessed installation in ceilings. 230V luminaire with integrated phase dimmable driver. Replaceable LED and driver – built for the future. Adjustable 90° and rotatable 355° – advantageously mount the luminaire in sloping ceilings and easily direct the light towards selected surfaces, such as walls or paintings, which gives better results than with recessed downlights. Using the DIP-Switch colour temp function, colour temperature is easily adjusted with the touch of a button on the back of the luminaire. Our luminaire with reflector technology is optimised to create a highly glare-free and sharp light distribution that directs the light on whatever you want to highlight. For improved glare reduction, the Honeycomb accessory can be added to the luminaire. Simply replace the reflector with a lens accessory to achieve a soft and pleasant light distribution with high luminous comfort. Why not install recessed tracklights in combination with tracklights on the track for well-balanced lighting.

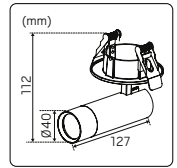

- Minimalist 230V spotlight with a fixing bracket for recessed installation
- Replaceable LED and driver – built for the future
- Adjustable 90° and rotatable 355°
- Selectable colour temperature via DIP-switch
- Dimmable – integrated phase dimmable driver
- With accessories such as honeycomb and lenses, you can increase glare reduction and change the light distribution
