ABB Purpose & Embedding Sustainability

ABB is committed to continually promoting and embedding sustainability across its operations and value chain, aspiring to become a role model for others to follow. With its ABB Purpose, ABB is focusing on reducing harmful emissions, preserving natural resources and championing ethical and humane behavior.

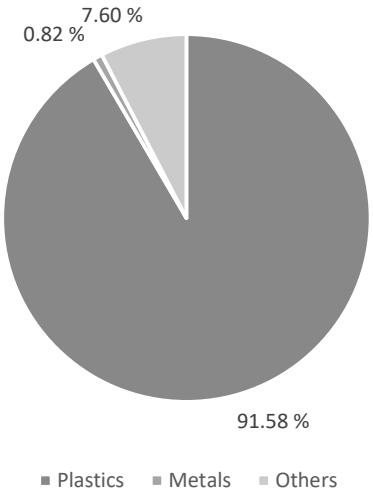
General Information

Reference product	2TKA00004663 - AUB60
Description of the product	Mounting box AUB60 is especially designed for off site and on site casting applications. Box height is 68 mm. Box has two inlets with locking springs for 20 or 25 mm conduits. Additional inlets can be attached to other sides without need of any tooling. The mounting box includes a rotating, steplessly adjustable extension ring. The extension ring can be tilted 0-4º. Box combinations can be created without additional accessories and box has large inside space.
Functional unit	Protect persons during 20 years against direct contact with live parts and allow grouping monitoring, control, and protection devices in a single enclosure or a cabinet having the following dimensions 68 x 133 x 98 (mm) while protecting against the penetration of solid objects and liquids (IP3X) in accordance with the standard IEC 60529.
Other products covered	2TKA00004657 - AUB60H 2TKA00004671 - AUB67 2TKA00004648 - AUB67H 2TKA00005323 - AUB67M 2TKA00005413 - AUB60H-R 2TKA00005554 - AUB60H-16

Constituent materials



Total weight of Reference product	121,62 g including packaging materials

Plastics as % of weight		**Metals as % of weight**		**Others as % of weight**	
Description	Weight-%	Description	Weight-%	Description	Weight-%
Polypropylene	64.56	Steel	0.64	Carton	7.60
Polyamide 6 GF25	10.65	Carbon steel	0.18	–	–
Recycled PP	9.55	–	–	–	–
Polycarbonate	4.93	–	–	–	–
LDPE	1.89	–	–	–	–

Products in this range comply with the RoHS Directive 2011/65/EU (covering 2015/863 (EU)) and national legisation. The plastic materials used in products are also halogen free materials (IEC/61249-2-21) and recyclable. The recycled plastic used in the product is from post-consumer plastic waste, which is collected from Finnish households

Additional Environmental Information

Manufacturing	Manufactured at ISO 14001 certified production site
Distribution	Product distribution optimised by setting up local distribution centres.
Installation	The product does not require special installation procedure and requires little to no energy to install. The disposal of the packaging materials is accounted during the installation phase.
Use	The product does not require special maintanence operations.
End of life	No special end-of-life treatment required. According to countries' practices this product can enter the usual end-of-life treatment process.
Benefits and loads beyond the system boundaries	Net benefits and loads calculated according to PCR ed 4 and formulas given in Annex G of the EN 50693

Environmental impacts

Reference lifetime	20 years
Product category	Unequipped enclosures and cabinets
Installation elements	No additional elements needed
Use scenario	Non applicable for unequipped enclosures and cabinets
Geographical representativeness	Nordics with emphasis on Sweden
Technological representativeness	The manufactruing processes considered are representative of the products production
Software and database used	Software: SimaPro version 9.4.0.2 Database: ecoinvent 3.8, Industry data 2.0, and ELCD
Energy model used	
Manufacturing	Electricity, low voltage {LT}| market for | Cut-off, S
Installation	Electricity, low voltage {SE}| market for | Cut-off, S
Use	-
End of life	Electricity, low voltage {SE}| market for | Cut-off, S

Other indicators

Indicator	Unit	Total	Manu-facturing	Distri-bution	Instal-lation	Use	End of life	Bene-fits
No Other indicators used								

For other products than the Reference product covered by this PEP, the environmental impacts for each phase of the lifecycle are obtained by multiplying the values of the Reference product by the following coefficients:

* if the coefficient is "1", the impacts of the phase of the life cycle are assimilated to the Reference product, meaning that the impacts are unchanged in comparison to the Reference product

Environmental Impact Indicator Glossary

Impact indicators

Indicator	Description	Unit
Global warming potential (GWP) - total	Indicator of potential global warming caused by emissions to air contributing to the greenhouse effect. The total global warming potential (GWP-total) is the sum of three sub-categories of climate change. GWP-total = GWP-fossil + GWP-biogenic + GWP- land use and land use change	kg CO_2 eq.
Ozone depletion (ODP)	Emissions to air that contribute to the destruction of the stratospheric ozone layer	kg CFC-11 eq.
Acidification of soil and water (A)	Acidification of soils and water caused by the release of certain gases to the atmosphere, such as nitrogen oxides and sulphur oxides	H+ eq.
Eutrophication (E)	Indicator of the contribution to eutrophication of water by the enrichment of the aquatic ecosystem with nutritional elements, e.g. industrial or domestic effluents, agriculture, etc. This indicator is divided to three: freshwater, marine and terrestrial.	kg P eq., kg N eq., mole N eq.
Photochemical ozone creation (POCP)	Indicator of emissions of gases that affect the creation of photochemical ozone in the lower atmosphere (smog) because of the rays of the sun.	kg NMVOC eq.
Depletion of abiotic resources – elements (ADPe)	Indicator of the depletion of natural non-fossil resources	kg Sb eq.
Depletion of abiotic resources – fossil fuels (ADPf)	The use of non-renewable fossil resources in an unsustainable way (e.g. from material to waste)	MJ (lower heating value)
Water Deprivation potential (WDP)	Deprivation-weighted water consumption. Assesses the potential of water deprivation, to either humans or ecosystems, building on the assumption that the less water remaining available per area, the more likely another user will be deprived.	m^3 e depr.

Resource use indicators

Indicator	Description	Unit
Total use of primary energy	Total use of non-renewable primary energy resources (primary energy and primary energy resources used as raw materials) + Total use of renewable primary energy re-sources (primary energy and primary energy resources used as raw materials)	MJ (lower heating value)
