REACH / RoHS / WEEE Compliance Declaration

OJ Electronics is dedicated to serving you by providing high quality engineered access hardware solutions that meet environmental regulations. We are providing you with the following information to assist you in meeting your environmental policies and procedures.

REACH

OJ Electronics A/S meets the requirements of REACH (Registration, Authorisation and Restriction of Chemicals, European Union Regulation (EC) 1907/2006) with amendments.

We are aware of our duties as a “downstream user”. We have assured that our key suppliers understand the importance of the REACH legislation and their duties in keeping us informed of any Substances of Very High Concern (SVHC) in products they supply to OJ Electronics. This in order for us to be able to act promptly if there is a suspicion, that any of the chemicals on the SVCH-list are used in our components in concentrations above 0,1%.

RoHS3

OJ Electronics A/S meets the requirements of RoHS3, meaning the Restriction of Hazardous Substances Directives 2011/65/EU (RoHS2) with amendments, including Directive 2015/863/EU (RoHS3).

Generally, OJ products are categorized under category 9:
“Monitoring and Control Instruments”

On top of this OJ Electronics A/S produces spare parts for products put on market before 2006. This category is not covered by the RoHS directive, which excludes these parts from the need to fulfill the RoHS directive. In spite of this fact, we continue to adjust our processes, materials etc. to make all our products fulfill the RoHS directive.

WEEE2

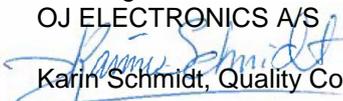

OJ Electronics A/S meets the requirements of WEEE2, Waste Electrical and Electronical Equipment Directive 2012/19/EU, which stipulates the collection and recycling of all kinds of electronical waste and which promotes the responsibility of manufacturers to collect and dispose of electronic waste.

OJ Electronics A/S has internal procedures for waste management and all new employees are provided training. The procedures adhere to current requirements from local and national authorities. OJ Electronics A/S currently sorts waste into at least twenty different subgroups.

To the best of our knowledge, all products sold by OJ Electronics A/S to Micro Matic Norge AS are in compliance with the above mentioned regulations.

Best regards

OJ ELECTRONICS A/S

Karin Schmidt, Quality Coordinator
