Order no.: 46674

Article number: 46674

EAN: 4010995466749

Customs tariff number: 82032000

Application: For cutting without crushing of copper cables up to 300 mm² (600 MCM) and aluminum cables up to 380 mm² (750 MCM) with a diameter of up to 34 mm. Suitable for work on live parts up to 1,000 V AC.

Cutting without crushing of stranded copper and aluminum cables up to Ø 34 mm (300 mm² Cu / 380 mm² Al)

One-handed and effortless cutting thanks to the 2-stage ratchet principle

Cancel manually by emergency unlocking

Space-saving and safe transport thanks to locking lever

Kind to hands and muscles

Safe operation up to 1,000 V AC

You want to have a clean cut when cutting cables with a large diameter? With the cable cutter from Wiha, stranded copper or aluminum cables (conductor class 2) with a diameter of up to 34 mm can be easily cut to length. The cable cutter provides absolutely clean, smooth cutting without crushing, while the two-stage ratchet function reduces the amount of force required thanks to the comfortable handle spacing for fatigue-free working. In addition, the cable cutter with ratchet principle offers simple and convenient one-handed operation, additionally aided by the ergonomic and non-slip soft handles with slip guard. Thanks to the emergency release function, the cutting process can be interrupted manually at any time and the cable removed from the cutting edge. The locking lever on the plier head ensures safe and space-saving transport. The insulated cable cutter is subject to routine testing as per the international IEC 60900 standard, thus ensuring safe work on live parts up to 1,000 V AC.

Tested according to IEC 60900.
