

Declaration regarding the REACH – Regulation

Seite 1 von 20

Dear Sir or Madam

The REACH Regulation EC No.1907/2006 demands the registration, evaluation, authorization and restriction of chemical substances (Registration, Evaluation, Authorization of Chemicals).

This regulation is based on the principle that manufacturers, importers and downstream users must ensure that they manufacture, place on the market and use substances that do not adversely affect human health or the environment. The purpose of the regulation is, inter alia, to ensure a high level of protection of human health and the environment, including the promotion of all alternative methods of assessing the risk of substances and to ensure the free movement of substances within the internal market. The REACH Regulation is always available to us in the current valid version with the corresponding annexes and every change is checked for its relevance. The above regulation is currently available in the corrigendum of 17.05.2024 (OJ L, 2024/1328).

ABB STRIEBEL & JOHN GmbH supplies electrotechnical products that are not substances or preparations in the sense of the regulation. Therefore, it is not necessary to prepare of safety data sheets for our products according to this regulation. As a "downstream user" in terms of Article 3 (12) of the Regulation, we ensure that the substances and preparations we use are registered in accordance with the REACH Regulation if applicable. According to the REACH Regulation, our suppliers are also obliged to inform us about any chemicals that are listed as notifiable in the current list of potentially hazardous substances (SVHC - **S**ubstances of **V**ery **H**igh **C**oncern). To increase your protection as a customer, ABB STRIEBEL & JOHN GmbH proactively and on its own initiative asks all its suppliers at regular intervals to provide information about the possible use of such chemicals.

Would you like an example?

On 27.06.2018 lead (CAS 7439-92-1) was assigned to the list of Substances of Very High Concern (SVHC). Following our obligation under Article 33 of the REACH Regulation, we therefore inform our customers which of our products may contain the SVHC-listed substance lead as an alloying element (e.g. made of brass) with concentrations >0.1% in individual components for manufacturing reasons.

The list of SVHC is available as of 08/07/2021 (published on the ECHA website in accordance with Article 59(10) of the REACH Regulation).

Information regarding SVHC substances reported to us by our suppliers can be found in the annex of this letter. In addition, you can obtain current information on the topic of material compliance in the supply chain at any time on this page: <https://new.abb.com/about/supplying/material-compliance>.

The use of these substances in our products complies with the applicable legal regulations. When used as intended, there is no danger to health or the environment. Safety instructions are therefore not required.

ABB STRIEBEL & JOHN GmbH,
Sasbach, 02.09.2024

i.A. Volker Eckert
