Introduction

1

Fuse protection - Easy and reliable

The fuse is a superior short circuit protection element regarding the maximum allowed cut-off current (peak let through current) and energy value.

This is more important the higher the voltage and prospective fault levels are. The SlimLine switch disconnector fuse fulfil the highest requirements for modern switch fuses with a total safety concept. The switch fuses are tested according to the EN 60947-3 standard with more stringent requirements for isolation, making, performance and safety. The fuse rails are tested according to IEC 60269-2-1.

The melting curves and current limiting diagrams for NH fuse links are given in the IEC 269-2 standard. The standardised fuse characteristics and high degree of current limitation ensure that there is a simple and effective co-ordination with fuse links and other devices.

Fuse links provide a simple procedure for selecting the right fuse type for your installation, without complicated calculations or calculation tools. Fuses prevent "blackouts". Only the fuse nearest a fault trips without upstream fuses (feeders or mains) being affected. Fuses thus provide selective coordination.

When more power is needed in an installation, more feeders can be added without changing the present structure or any new selectivity calculations. Fuse links will assure selectivity in the installation by 1,6:1 difference in the rated current.

Economical installation

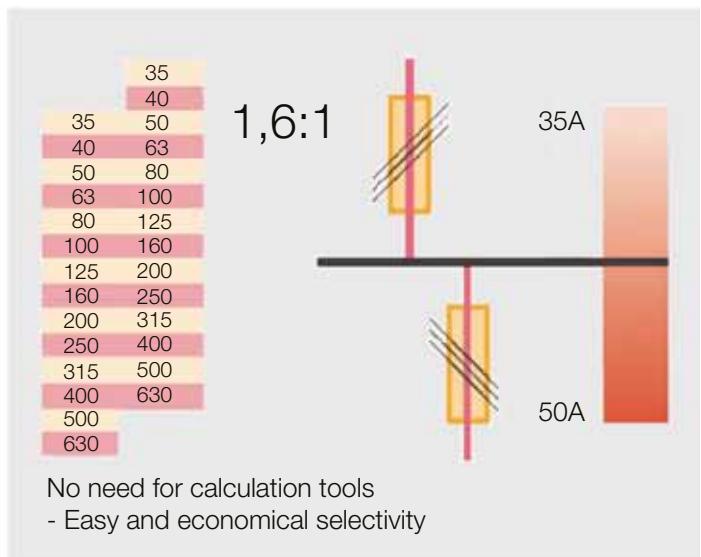

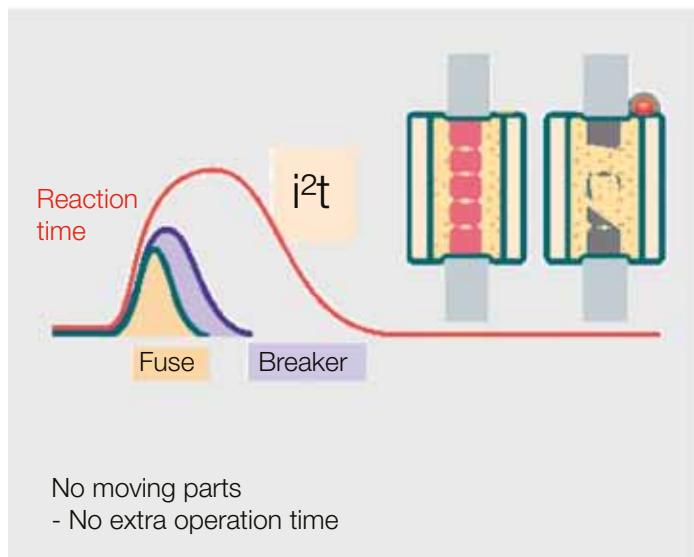

Lifetime costs of fuse systems are low. Fuse links which can withstand a high fault level and a fault current, are available at economical prices.

After fuse operation, only the fuse link has to be changed. Because the fuse links can be rapidly and easily replaced, plant down time and maintenance are substantially reduced with a fuse link system.

Because the fusing elements operate in a cylinder, they are not affected by their surroundings. Thus their protecting characteristics remain stable year after year. The dynamic stress on the network and its equipment is dependent of the let through energy (i^2t) at a short circuit. The fuse link provides the best protection compared to other solutions, at high short circuit currents.

As the fuse link body is filled with quartz sand, there will be no emission of gases or arcs when a short circuit occurs. This again leads to less stress on the network and a higher degree of personal safety.

- Economical installation
- Easy and economical selectivity
- No need for calculation tools
- No need to change the present structure when power is needed
- No moving parts
- No extra operation time
- No arc space
- No emission of gasses at short circuits

Introduction

1

The EasyLine family consist of 1, 2, 3 and 4 pole solutions, rated from 100A - 630A.

All units are applicable for AC Voltage, and the 1-pole and 2-pole range are also rated for DC voltage.

In addition to be used as single apparatus, the 3-pole range from size 00 to size 3 (160A - 630A) are also designed to be used in distribution systems by use of a busbar adapter for easy installation. The Busbar adapters are available for 40mm, and 60mm distance in-between centre of the phases for each busbarsystems. The whole EasyLine range got a sturdy, uniform design that is operator friendly and safe with IP 30 from front in closed position and IP 20 in open position.

EasyLine Fuse Switch Disconnectors are developed and type tested according to IEC60947-3 and based on a long history, going back to 1958 when we successfully introduced the manually dependent operated LHB.

- All variants of poles are available in the different sizes: NH00/160A, NH1/250A, NH2/400A and NH3/630A.
- The XLP 1-pole and 2-pole: Rated operational votage: 220-440VDC / -690VAC
- The XLP 4-pole: Rated operational votage: 500VAC

Introduction

1 Features of the EasyLine - XLP:

- All the XLP cable terminals can be delivered with integrated bolts for cable lugs or with integrated bridge clamps (BC) for easy direct cable connection.
- Compact XLP000
- Type tested according to EN60947-3
- Fullfills BGV A2
- Easy to recycle / EN14001 standards
- Quick-make operation device
- Integrated IP20 cable termination
- IP30 degree of protection from the front
- Replacement compatible to similar types in the market
- Voltage measuring from the front
- V-0 plastic materials

Advantages of the EasyLine - XLP:

- Easy to install
- Easy to operate
- Functional and modern design
- Sturdy design
- High personal safety
- Wide range of cable terminals and snap-on accessories
- Compact, add-on Electronic Fuse Monitoring (EFM)
- Busbar adapters

Overview 1-pole

XLP 1-pole

- Rated operational voltage: 220VDC / -690VAC
- Rated operational current: 160 - 630A
- Micro auxillary switches, 1 or 2 pcs per pole
- Single cable shroud per phase
- Cable clamps
- Front frames
- Padlocking
- Sealing facility

2

Application

- UPS: Uninterruptible Power Supply, used for the power supply for computer/servers, storage devices, communication network systems, industry control systems, etc.
- Telecom Power Supplies.
- General protection in smaller distribution panels using 1-pole or 2-pole configurations AC or DC.

Overview 2-pole

XLP 2-pole

- Rated operational voltage: 220 - 440VDC / -690VAC
- Rated operational current: 160 - 630A
- Micro auxillary switches, 1 or 2 pcs per pole
- Single cable shroud per phase
- Cable clamps
- Front frames
- Padlocking
- Sealing facility

3

Application

- UPS: Uninterruptible Power Supply, used for the power supply for computer/servers, storage devices, communication network systems, industry control systems, etc.
- Telecom Power Supplies.
- General protection in smaller distribution panels using 1-pole or 2-pole configurations AC or DC.

Overview 3-pole

XLP000

- Compact design for NH 00 compact fuses up to 100 A (width = 21mm)
- Modern integrated cable clamps for 1,5 - 35 mm² cables
- Integrated cable shrouds IP 20
- Snap on for DIN rail mounting (accessory)
- Front frames for 1 - 3 apparatus (accessory)
- Micro auxiliary switches, 1 or 2 pcs (accessory)
- Sealing facility

4

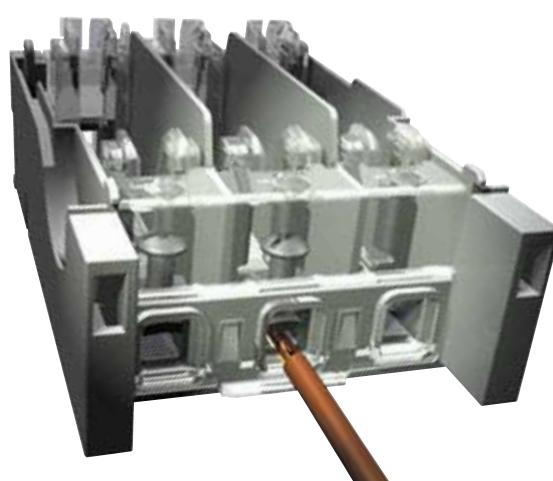

Front frames for
1-3 apparatuses

DIN rail mounting

Voltage measurement

Integrated cable clamps
for 1,5 - 35 mm² cables

Overview 3-pole

XLP00

- Electronic fuse monitoring (EFM)
- Micro auxilliary switches, 1 or 2 pcs
- Auxilliary switches, 1 NO or 1 NC acc. to IEC 60947-5-1
- Cable shrouds
- Front frames for 1 - 3 apparatus
- Wide range of cable terminal clamps (See page 13 and 14)
- Kit for double DIN rail mounting
- Adapter for 40 and 60 mm busbar distance
- Padlocking facility
- Sealing facility

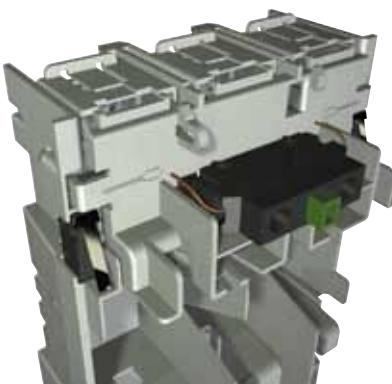

4

Padlocking and Sealing facilities

Electronic fuse monitoring showing detail for remote signaling

Micro auxiliary switch on the sides.
Auxiliary switch NO or NC in the front

Cable shrouds

Overview 3-pole

XLP1, XLP2 and XLP3

- Electronic fuse monitoring (EFM)
- Micro auxilliary switches, 1 or 2 pcs
- Auxilliary switches, 1 NO or 1 NC acc. to IEC 60947-5-1
- Cable shrouds
- Front frames
- Wide range of cable terminal clamps (See page 13 and 14)
- Adapter for 40mm (only XLP1) and 60mm busbar distance
- Padlocking facility
- Sealing facility

4

Overview 4-pole

XLP 4-pole

- Rated operational voltage: 550VAC
- Rated operational current: 160 - 630A
- Micro auxillary switches, 1 or 2 pcs per pole
- Single cable shroud per phase
- Cable clamps
- Front frames
- Padlocking
- Sealing facility

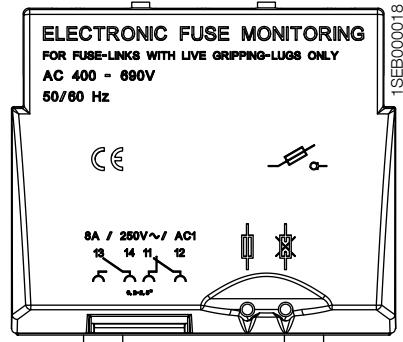

5 Application

- General fuse protection in 4-pole power supply networks with switching neutral.
- Secondary power generators from public networks

Electronic Fuse Monitoring 3-pole

The Electronic Fuse Monitoring (EFM) is a fuse blown indication device. The EFM unit has an integrated potential free relay (1NO, 1NC) for remote signal/alarm. It will be automatically reset after the blown fuse has been replaced and the green LED turns on again.

The matrix below show all possible cases of indication

Fuse status			Relay contacts			
	Green	Red	NO contact 13, 14		NC contact 11, 12	
1. Closed			Open	Closed	Open	Closed
Fuses OK			X			X
Fuses BLOWN				X	X	
2. Open						
Fuses OK			X			X
Fuses BLOWN			X			X

Power supply to the EFM unit from phase L2 and L3

The fuse monitor is connected to the gripping lugs of the fuses.

- NOTE :**
- NH fuses with insulated gripping lugs can not be used.
 - The EFM unit requires that the supply side of the XLP should be on top of the switch.

Technical data:

Min. operation voltage	290V -10%
Max. operation voltage	690V +10%
Operation temp. range	-25/+80C
Operation time	< 2 sec.
Power consumption	< 3VA
Uimp. over a blown fuse	12,3kV
Uimp. between phases	9,8kV
Uimp. between main circuit / relay contacts	9,8kV
Dielectric test voltage input/output	3,5kV / 50Hz / 1 minute
Electrostatic Discharge	EN 61000-4-2 +- 4kV
Electrical Fast Transient	EN 61000-4-4 +- 4kV
Conducted Fast Transient	EN 61000-4-6 10Vrms/150kHz-80MHz
Recommended cable size	AWG 22-12/0,2-2,5mm ²
EMC tested	Yes

Relay:

Nominal current	8A
Max. switching voltage	240VAC, 24VDC

Busbar Adapters

60mm for XLP00, XLP1, XLP2 and XLP3

7

60mm busbar system

Designed for 60 mm busbar distance

XLP00 and XLP1 use busbar Cu/Al 5 or 10mm x 10-30mm. 3 pieces of distance shoes for 5 mm busbars are included with the adapter.

For XLP2 and XLP3 use busbar Cu/Al 5-10mm x 10-30mm. The adapters are available for cable connection above (A) or cable connection below (B).

Distribution system for standard Busbars type SF-60

The busbar system type SF-60 is designed to take busbars of different cross sections, and it is type tested to VDE-0660, section 50 and IEC 439-1.

The SF-60 Busbar system features

Busbar width	10 - 30 mm
Busbar thickness	5 or 10 mm
Centre distance between busbars	60 mm

Cable connection supply module

Electrical data	690V / 440A
Cable connections	Al/Cu 35 - 120mm ²
Dimension (W x H x D)	81 x 200 x 84 mm

Busbar Adapters

40mm for XLP00 and XLP1

40mm busbar system

Cu 12 x 5mm or 12 x 10mm.

Adapter 95 mm depth to busbars: A 40/95

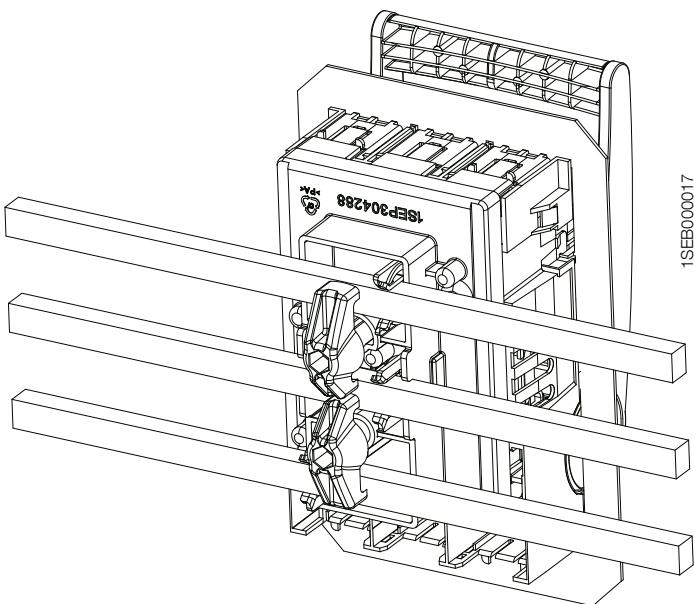

40 mm Busbar system for Striebel & John switchboards

Specially designed for the Striebel & John Busbar system 250A and 360A.

Cu 12x5 or 12x10 mm.

Adapter 75 mm depth to busbars, cable connection below: A 40/75

Adapter 120 mm depth to busbars, cable connection below: A 40/120

Cable clamps & bolts

	Type of clamp/bolt	Conductor cross section min-max					Order code
