Varmekabelmatte for tining av snø og is, og tining av bakken/grunnen.

STANDARDER

Produkt IEC 60800

Test EN 50265; IEC 60332-1

Heating cable mat for thawing ground melting snow and ice. The mat is connected via the plug coming with the product to a standard 230V (Schuko) socket. The mat is particularly useful if you need to dig into the ground and to thaw the ground. It can also be used at entrances to remove snow and ice, to melt frozen pipes, or wells/similar.

The heating cable mat is manufactured using a special PVC compound integrated with a nylon woven net. The insulation in the mat (directing the heatflow downwards) is made of self-extinguishing foam plastic. The mat has a built in protection against overtemperature, and power will be interrupted if the temperature of the mat exceeds 60 degrees Celsius.

Length cold lead: 2,5 m

The mat is not intended for permanent installations, and the mat shall not have a permanent connection to the power supply.

Energy consumption is low and equals 24 kWh/day (approximately 8kWh/m²/day)

CE marked, compliant with EN 60335-1 and EN 62233

ATTENTION!

This product must be used exclusively for thawing and snow/ice melting applications. Follow the instructions printed on the product!

KARAKTERISTIKKER**Dimensjonsegenskaper**

Mattelengde	3 m
Mattebredde	1 m
Høyde	20 mm
Vekt pr. stk. (ca.)	11 kg

Elektriske egenskaper

Driftsspenning (V)	230 V
Effekt	1000 W
