

# ACTOR G2 CEILING

Actor G2 Ceiling is a surface-mounted luminaire. Its clean, edge-aligned design blends seamlessly into the ceiling for a discreet look—ideal for spaces where the light should be visible but not dominant. The built-in DIP switch allows you to adjust the colour temperature directly on site. No need to plan everything in advance; the light can be fine-tuned after installation. The modular construction means you only replace the necessary part. Actor G2 Ceiling is perfect for corridors, entrances, and for wall or picture lighting. It can be installed individually, linked into continuous light lines, or arranged in patterns that follow the room's shape. Each luminaire acts as both leader and follower. For suspended mounting, a separate suspension kit is available, providing downlight only. Choose from a range of glare shields to adapt the light to the setting: opal, microprismatic, double parabolic or asymmetric or highlighting walls and artwork.

- Complete luminaire for **ceiling and wall mounting**  
– perfect for corridors, entrances, and educational environments
- **Flexible light adjustment via DIP switch**  
– select color temperature 3000K/4000K
- **Visual comfort with selectable glare protection**  
– opal, microprismatic, double parabolic, or asymmetric (e.g. for picture lighting).
- Service-friendly construction  
– **replaceable LED & driver**
- **Easily link up to 15 luminaires**  
create continuous light lines and patterns
- **Control options:**  
Dimmable, DALI
- **Mounting accessories:** Extension arm, wall bracket, system ceiling mount and suspension kit
- Color rendering: **Ra>90**
- Lifespan: L80 **100.000h**, L100 **100.000h** CLO LED and driver
