

LEDSTRIP 24V LINE

The new LEDstrip 24V Line takes our popular LED strip to the next level. Whether you are creating ambient lighting, marking walkways or highlighting details, you get a homogeneous, dot-free light – even without a cover – now with a shorter cutting interval (IP20). Both IP20 and IP67 deliver even, shadow-free illumination and are perfectly suited for Hide-a-lite's range of aluminium profiles. This makes them ideal for creating continuous light lines in handrails, around mirrors, in furniture, or as guiding light in kitchens and bathrooms. The short cutting interval of just 8 mm (IP20) makes it easy to create custom lengths with light reaching all the way to the edge of the profile. For IP67, the cutting interval is 31 mm. The variants are available in Lowlum and Midlum, with colour temperatures of 2700K or 3000K and Ra90 for natural colour rendering.

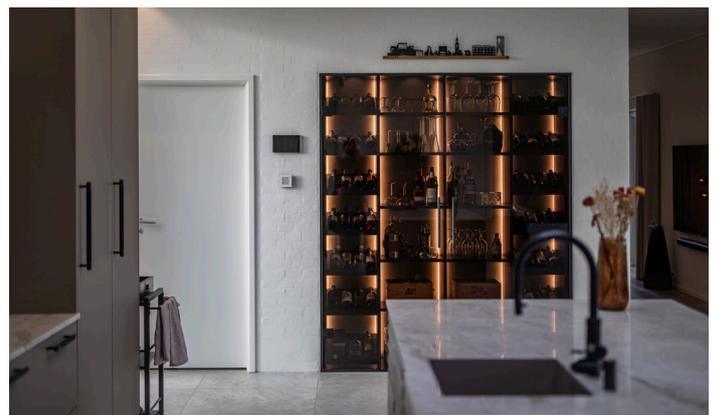

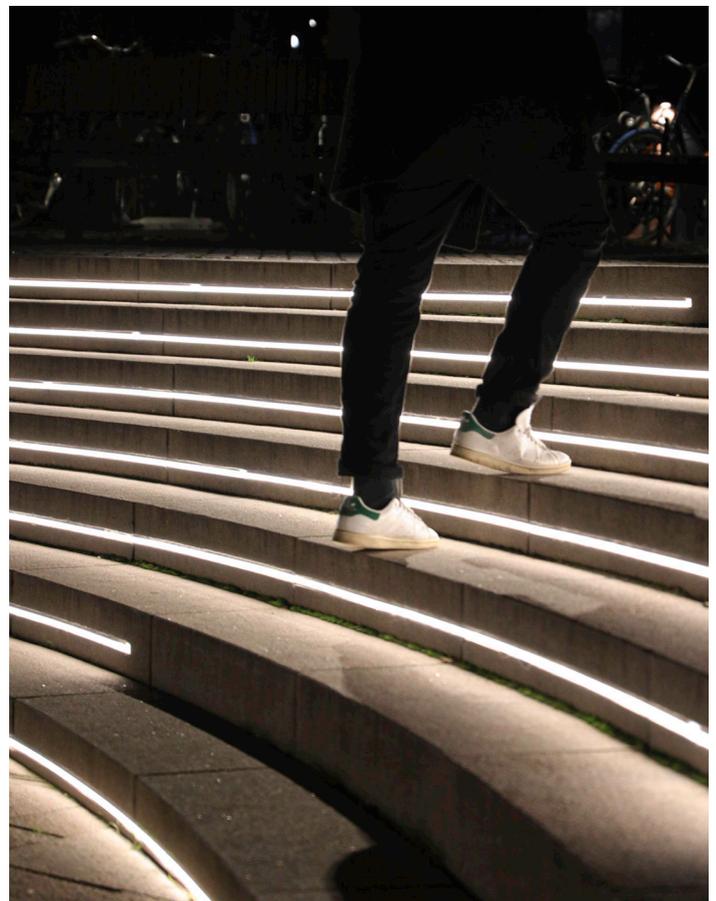

- **Even, shadow-free light lines** without cover caps
- Available in **Lowlum** and **Midlum**
- Extremely **short cut interval**
– only 8 mm (IP20), 31 mm (IP67), max length 6 m
- **Perfect fit** for our aluminum profiles
- Delivered **ready-to-install**
– 5 m roll with connection cable at both ends
- **Linear metres are supplied without connection cable as standard** – available with cable on request
