

Rittal – system partners

Perfect holistic solutions

The demands placed on Ex enclosures are particularly high. For this reason, Rittal accepts no compromises, and adapts tried and tested enclosure concepts to meet the specific requirements of potentially explosive environments. The result is a series of empty enclosures providing ideal conditions for applications in the chemicals and petrochemicals industries, in the offshore sector and in the foods industry.

The added value of our integral solutions

Enclosures for every application in numerous sizes and designs.

Fast, cost-effective system integration through comprehensive accessories.

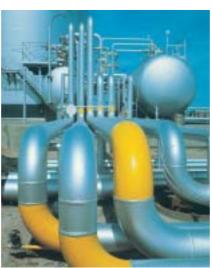

High product quality ensuring reliability.

Worldwide availability without delays.

International approvals and certification.

Faster + better + cost-effective: That is the formula for a modular configuration concept and individual Rittal solutions.

Empty enclosures to ATEX satisfy approval criteria to the full

Zone 1 and 2 to EN 50 014 and EN 50 019.

Zone 21 and 22 to EN 50 281.

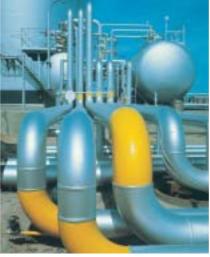

Partial certification to ATEX 100a (EC Directive 94/9/EC).

Ambient operating temperature: Maximum: +80°C Minimum: -20°C.

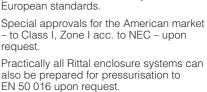

Protection category: With IP 56 or IP 66 to EN 60 529, the required level of protection is reliably

exceeded.

Constantly high quality is guaranteed by production and routine testing procedures with ISO 9001 certification.

Further dimensions and versions upon request, also to meet individual certification requirements.

Perfect response to special

Worldwide implementation of explosion

protection is based essentially on the

demands

request.

Rittal Ex enclosures Individual Ex accessories

Approval by a test institute

Three enclosure types to meet differing demands

The enclosures in this brochure are approved for use in potentially explosive atmospheres attributable to gases and/or dusts.

Our own accredited laboratories and the latest manufacturing technologies, paired with comprehensive quality management, guarantee constantly high standards worldwide.

Stainless steel Ex enclosure with screw fastened lid Type Examination Certificate No. PTB 02 ATEX 1013U

For wall mounting: 4 blind rivet nuts M8.

To discharge possible static charges: Blind rivet nut M8 at side.

For simple attachment of support rails or mounting plates in the enclosure: Profile strips with

mounting holes on both sides.

PE conductor connection in enclosure and cover.

Captive-mounted cover attachment.

Stainless steel Ex enclosure with hinged door

Type Examination Certificate No. PTB 02 ATEX 1082U

For wall mounting: 4 blind rivet nuts M8

To discharge possible static charges: Blind rivet nut M8 at side.

Door is simple to remove when open.

Double-bit insert in the cam lock, exchangeable for other lock inserts.

Mounting plate both sides with pitch pattern for easier configuration

PE conductor connection in enclosure and

Plastic Ex enclosure with hinged door Type Examination Certificate No. **PTB 02 ATEX 1011U**

For wall mounting: 4 press-fit screw bushes M8.

Double seal at top and bottom edges of the door through additional integrated rain protection strip.

Enclosure can be rotated to switch door hinging to the other side.

Door opening angle 180°.

Double-bit insert in the lock. exchangeable for other lock inserts.

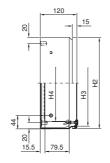

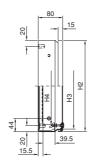

Manufactured in fibre-glass-reinforced, unsaturated polyester with a high graphite

Surface resistance: < 109 Ohm.
