

Junction box T 100, plug-in seal, terminal strip

All the T series junction boxes are UV-resistant. They are made of a thermoplastic polypropylene plastic with plug-in seals made of ethylene vinyl acetate (EVA). This plastic is soft, which means that it is malleable. This allows installation of cables through the 10 x M25 seals, or the seals can be cut with a knife at the pre-marked points, in order to create an insertion opening for cables or pipes. Alternatively, instead of seals, cable glands can be inserted through the openings and be countered internally with a locknut. The junction boxes can be mounted on mounting plates in the openings on the floor using steel bolts 3.5 x 9.5. Clear internal dimensions: 136x102x57 mm. Cover with labelling panel and lead-sealed.
