

FDV dokument

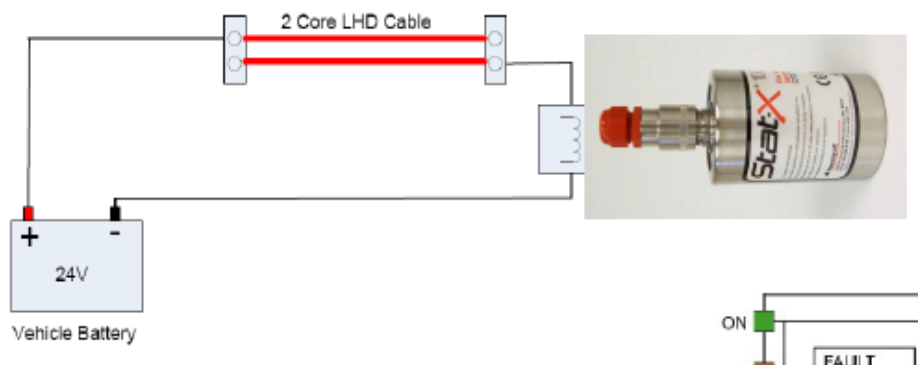

Produkt: Kabeladaptor m/nippel
El.nr.: 62 147 55
Type: 14640
EAN: 7070713139888
Antall: 1
Enhetstekst: Stk

PRODUKTBeskrivelse

Kabeladaptor med nippel $\frac{3}{4}$ "-metrisk.

TEKNISKE SPESIFIKASJONER

The LHD (Linear Heat Detection) Cable:

At normal operating temperature the two conductors in the cable are insulated from each other. At the specified detection temperature the insulation will melt away and the two conductors will make electrical contact with each other.

The circuit above has, by using the LHD cable, a "temperature switch" that will close and make electrical conductivity and thus activate the Stat-X unit(s), at the specified temperature of the cable.
