

LiYCY-JZ Tallkodet PVC isolert styrekabel, fleksibel, skjermet

GENERELT:

Fleksibel skjermet styre- og kontrollkabel. LiYCY-JZ styrekabler egner seg for bruk på maskinutstyr innendørs. Den egner seg også spesielt godt som kontrollkabel mellom styreenheter og som signalkabel innen instrumentering. Den er uten indre mantel og er derfor meget smidig og bevegelig og er lett å tilpasse i kabelkanaler etc. Denne kabelen har meget gode EMC egenskaper p.g.a. den flettede skjermen. Denne type kabel kan benyttes i tørre, fuktige og våte rom. Lederne er nummererte og nummereringen er gjentatt for hver 20 mm. Kappe er i grå PVC. God bestandighet mot olje.

OPPBYGGING:

Ledere av fintrådet kobbertråd ihht. IEC 60228 cl.5
Ledere PVC isolert (Spesial), fargen er sort med hvite tall ifølge VDE 0293
Skjerm av flettet fortinnet kobberlisse med dekning på ca: 85 %.
Ytre kappe er i spesial PVC, farge grå.

TEKNISKE DATA:

PVC egenskaper	: Selvslukkende og flammehemmende
Minste bøyeradius	
Bevegelig	: 10 x kabeldiameter
Fast forlagt	: 5 x kabeldiameter
Temperaturområde	
Bevegelig	: ÷5 - +80°C
Fast opplegg	: ÷30 - +80°C
Prøvespenning	: 4000 V
Driftsspenning: U ₀ /U	: 300/500 V
Flammetest	: IEC 60332-1.
