

AMUN 716 KNX

Article number: 7169200

Description

- CO₂ airquality sensor
- Measures CO₂ level, relative humidity and temperature
- Three independent, configurable thresholds for the CO₂ level and relative humidity
- A threshold for the temperature
- Actions can be carried out if thresholds are exceeded or not reached (send, priority, switching, value)
- Display of achieved threshold of CO₂ level and relative humidity through multi-coloured LEDs
- CO₂ setting range of 500-2250 ppm (thresholds)
- Relative humidity of 1 % to 100 %
- "Physical value" object of 0-9999 ppm
- Power supply via KNX bus voltage, 230 V mains supply not required

Technical data

Operating voltage KNX	Bus voltage, ≤10 mA
Measuring range CO ₂	300 – 9999 ppm
Measuring range temperature	+0 °C ... +40 °C
Measuring range humidity	20 – 80 % rF linear
Ambient temperature	-5 °C ... +45 °C
Installation type	Wall installation
Type of protection	IP 20
Protection class	III as per EN 60 730-1

Scale drawings
