

# TD-1

## PROGRAMMABLE TEMPERATURE DETECTOR

Intruder detectors are an important part of SATEL product line. Wide range of motion detectors is completed by other kind of detection devices like acoustic glassbreak detectors, selection of magnetic contacts or impressive range of gas detectors. Continuous research in the detection field lead to constant improvement and introduction of new designs based on breakthrough technologies.

### FEATURES

- programmable threshold and temperature gradient
- possibility to work in two modes (economy feature)
- support for external temperature sensor
- two relay outputs to control external devices

### TECHNICAL SPECIFICATION

Supply voltage	12 V DC $\pm$ 15%
Standby current consumption	15 mA $\pm$ 20%
Maximum current consumption	50 mA
Relay contacts rating (resistive load)	1 A / 30 V DC
Environmental class	III
Working temperature range	-35°C...+60°C
Enclosure dimensions	48 x 78 x 18 mm
Weight	108 g
