INT-SF-BSB

PARTITION KEYPAD

The **INT–SF–BSB** partition keypad allows you to control operation of each alarm system based on the control panels of **INTEGRA** and **INTEGRA Plus** families. To maintain a uniform design line of the controls, it is recommended that the INT–SF partition keypad be used in alarm systems including the **INT–KLFR**, **INT-TSI**, **INT-TSG** and **INT-KSG** keypads.

The **INT–SF–BSB** partition keypad has a sleek, dark enclosure. The device is also available in a light color version, designated **INT–SF–SSW**.
