

- Traditional angular sauna heater stones with high quality
- For electric heaters and as a top stone for wood burning heaters
- Split-face stones store plenty of heat, making the water thrown onto them vaporise efficiently on the broad fracture surface
- The split-face stones are easy to stack and enable good air circulation
- Excellent heat storage capacity, durability and thermal conductivity
- Color and stone species: Dark gray olivine diabase
- Stone size 5-10 cm and box weight 20 kg
- Does not contain harmful ingredients
- Check the right stone size for your heater from the heater manual
