

sg00719\_r

## Description

- High-quality residual current device / miniature circuit breaker combination, line voltage-dependent
- Increased protection in applications with 1-phase frequency converter due to the detection of mixed frequencies (type F)
- Reduction of nuisance tripping (type F or G/A) thanks to
  - time delayed tripping
  - increased current withstand capability
  - 3 kA
- Higher load rating with DC residual currents up to 10 mA (Type F)
- Contact position indicator red - green
- The -OL types are specifically designed to fulfill the tripping characteristic requirements of  $I_2 \leq I_z$  in the Norwegian electrotechnical standard NEK 400-8-823.
- Fault current tripping indicator white - blue
- Guide for secure terminal connection
- 3-position DIN rail clip, permits removal from existing busbar system
- Comprehensive range of accessories can be mounted subsequently
- Wide variety of rated tripping currents
- Rated currents up to 25 A
- Tripping characteristics B, C, D
- Rated breaking capacity 10 kA

## Specifications | Combined RCD/MCB Devices NdRBM, digital

### Description

- Combined RCD/MCB device
- Line voltage-dependent tripping
- Compatible with standard busbar
- Twin-purpose terminal (lift/open-mouthed) above and below
- Busbar positioning optionally above or below
- Free terminal space despite installed busbar
- Guide for secure terminal connection
- Contact position indicator red - green
- Fault current tripping indicator white - blue
- Comprehensive range of accessories suitable for subsequent installation
- The test key "T" must be pressed every year. The system operator must be informed of this obligation and his responsibility in a way that can be proven. Under special conditions (e.g. damply and/or dusty environments, environments with polluting and/or corroding conditions, environments with large temperature fluctuations, installations with a risk of overvoltages due to switching of equipment and/or atmospheric discharges, portable equipment ...), it's recommended to test in monthly intervals.
- Pressing the test key "T" serves the only purpose of function testing the residual current device (RCD). This test does not make earthing resistance measurement ( $R_E$ ), or proper checking of the earth conductor condition redundant, which must be performed separately.
- **Type -A:** Protects against special forms of residual pulsating DC which have not been smoothed.
- **Type -G:** 10 ms time delay to avoid unwanted tripping (e.g. during thunderstorms).
- **Type -F:** Sensitive to pulsating DC residual current and detection of multi-frequency residual currents up to 1 kHz
  - Increased protection due to the detection of mixed frequencies
  - Higher load rating with DC residual currents up to 10 mA
  - Reduction of nuisance tripping thanks to time delayed tripping and increased current withstand capability of 3 kA
 Recommended for washing machines, dish washers, or motor applications with single-phase drives.
- **-OL Types:** Specifically designed to fulfill the tripping characteristic requirements of  $I_2 \leq I_z$  in the Norwegian electrotechnical standard NEK 400-8-823.

### Accessories:

Auxiliary switch for subsequent installation	ZP-IHK	286052
	ZP-WHK	286053
Tripping signal switch for subsequent installation	ZP-NHK	248437
Shunt trip release	ZP-ASA/..	248438, 248439

**Local Indication RCD**

**Service Mode (measuring of residual current  $I_{\Delta}$ )**

Pressing test button twice to activate Service-Mode

Measurement delimiter	red
Measurement delimiter ON time	400 ms
10 mA measurement color	amber
1 mA measurement color	green
Double-pressing test button to activate Service Mode	press (0.1-0.4 s) -> release (0.1-0.4 s) -> press (0.1-0.4 s)
Time duration of Service Mode	4 min (during activated Service Mode all protection functions are still working)

**Lamp test**

### Technical Data

		NdRBM
<b>Electrical</b>		
Design according to		IEC/EN 61009 Type G according to ÖVE E 8601
Current test marks as printed onto the device		
Number of protected poles		2
Tripping		line voltage-dependent, 10 ms delay, 3 kA (8/20µs) surge current-proof
Type G / Type F		
Rated voltage	$U_n$	240 V AC, 50 Hz
Rated operational voltage	$U_e$	204-260 V AC
Voltage range test circuit		195-264 V AC
Rated tripping current	$I_{\Delta n}$	30, 100 mA
Rated non-tripping current	$I_{\Delta no}$	0.55 $I_{\Delta n}$
Sensitivity		AC and pulsating DC, Type F according to IEC 62423
Press of test button duration		> 0.5 s
Selectivity class		3
Service short circuit capacity	$I_{cs}$	7.5 kA
Rated short circuit capacity	$I_{cn}$	10 kA
Rated current		6 - 25 A
Rated impulse withstand voltage	$U_{imp}$	4 kV (1.2/50µs)
Characteristic		B, C, D
Maximum back-up fuse (short circuit protection)		100 A gL (>10 kA)
<b>Endurance</b>		
electrical components		≥ 4,000 operating cycles ( $I_n, U_n, \cos\phi = 0.87$ )
mechanical components		≥ 10,000 operating cycles
<b>Mechanical</b>		
Frame size		45 mm
Device height		80 mm
Device width		35 mm (2MU)
Mounting		3-position DIN rail clip, permits removal from existing busbar system
Degree of protection switch		IP20
Degree of protection, built-in		IP40
Upper and lower terminals		open mouthed/lift terminals
Terminal protection		finger and hand touch safe, DGUV VS3, EN 50274
Terminal capacity		1 - 25 mm <sup>2</sup>
Terminal screw		M5 (with slotted screw acc. to EN ISO 4757-Z2, Pozidriv PZ2)
Terminal torque		2 - 2.4 Nm
Busbar thickness		0.8 - 2 mm
Operation temperature		-25°C to +40°C
Storage- and transport temperature		-35°C to +60°C
Resistance to climatic conditions		acc. to IEC 68-2 (25..55°C / 90..95% RH)
Line side (supply)		lower terminals
Load side		upper terminals
