Noratel's Product Line

Noratel is proud to present one of Europe’s most comprehensive range on dry-insulated transformers and power-supplies.
The wide product-range include everything from small wound reactors to large three-phase power transformers.

Customised solutions

Noratel's engineers act as design partners to our customers. Together, we evaluate our customer's requirements and the application of their product and decide whether these requirements can be covered by standard products, or whether a customized solution is necessary.

Noratel has the facilities and the expertise to design and manufacturer customised solutions in-house.
