According to UL 60947-4-1:

Use wire Cu 75°C only. Use built-in cable clamps or use Listed (ZMVV) Wire Connectors and Soldering Lugs. Wire connectors (Cable pole-shoe) crimped with special factory crimp tool. Enclosure with min. dimension 24 by 20 by 10 inches should be used.

AF(S)116-30, AF(S)140-30, AF(S)146-30: Suitable for use on a circuit capable of delivering not more than the max. symmetrical amperes at the max. voltage, shown in SOC.

i Only use wires of the same dimension when you connect 2 wires to each terminal.

- Notice.** This product has been designed for environment A. Use of this product in environment B may cause unwanted electromagnetic disturbances in which case the user may be required to take adequate mitigation measures.
- Hinweise.** Dies ist ein Produkt für Umgebund A. In Haushaltsumgebung kann dieses Gerät unerwünschte Funkstörungen verursachen; in diesem Fall kann der Anwender verpflichtet sein, angemessenne Maßnahmen durchzuführen.
- Notice.** Ce produit a été conçu pour environnement A. L'utilisation de ce produit dans environnement B peut causer de perturbations électromagnétiques non désirées qui, dans ce cas, peuvent obliger l'utilisateur à prendre des mesures d'atténuation appropriées.
- Obs.** Den här produkten har konstruerats för miljöklass A. Användning av produkten i miljöklass B kan förorsaka oönskade elektromagnetiska störningar och i så fall krävs att användaren vidtar nödvändiga åtgärder.
- Avvertenza.** Questo prodotto è stato progettato per l'ambiente A. L'uso di questo prodotto nell'ambiente B può provocare disturbi elettromagnetici indesiderati, nel qual caso l'utilizzatore può dovere prendere adeguate misure per loro attenuazione.
- Nota.** Este producto ha sido diseñado para ambientes A. El uso de este producto en ambientes B puede causar perturbaciones electromagnéticas no deseadas, en tal caso usuario tendrá que tomar las medidas de mitigación adecuadas.
- 警告!** 本产品适用于环境 A, 在环境 B 中使用本产品会产生有害电磁干扰, 在此情况下用户需采取适当防护措施.
- Замечание.** Устройство разработано для применения в средах категории А. Применение в средах категории В может привести к возникновению нежелательных электромагнитных помех. В этом случае могут потребоваться дополнительные меры защиты от помех.

General

AF-contactors are fitted with an electronic interface.

Code-11...-14, optimized for wide voltage range and stability

Operation is done, as with conventional contactors, by applying and removing supply voltage on A1 and A2. Closing when 80% above the lower nominal voltage limit, opening when below 55% of the lower nominal voltage limit, which is indicated in the functional diagram.

Code-42 and -43, optimized for short operation times

Operation is done, as with conventional contactors, by applying and removing supply voltage on A1 and A2. Closing when 80% above the lower nominal voltage limit, opening when below 20% of the upper nominal voltage limit. Undefined function between the limits.

Code-31...-34 built-in PLC interface

Operation is controlled by separate logic control signals from for instance a PLC. Use of logic control requires a steady supply voltage on A1 and A2 within the rated voltage range, as described for code-11...-14. The function of the logic control signal will no longer be guaranteed when the supply voltage on A1 and A2 is removed.

The logic control signals are operated with 24V d.c. There are two control signals (ON and OFF_N) and a common reference (COM). For the control signals, the function is guaranteed from 15V d.c. (6mA) to 33V d.c. (20mA).

The contactor is closed by a control signal ON and opened by removal of control signal from OFF_N. The functions are described in the diagram below. "1" means 24V d.c. between the control signal and COM. "0" means no voltage between the control signal and COM. Minimum control signal pulse length for opening and closing is 10ms. To connect the PLC interface use cable dimension of max 1.5mm²

When used with switches the wiring can be done according to diagram above.
