

ABB i-bus® KNX

IP Interface, MDRC

IPS/S 3.1.1, 2CDG110177R0011

Product description

IP Interface 3.1.1 is the interface between KNX installations and IP networks.

KNX devices can be programmed via LAN using ETS, and clients, e.g. visual display systems, can access the KNX bus via the IPS/S 3.1.1 (five tunneling servers are available from ETS4).

The device uses the KNXnet/IP protocol from the KNX Association (tunneling).

The device is powered by 12 to 30 V DC or PoE (Power over Ethernet).

Note

For a detailed description of the application see „*IP Interface IPS/S 3.1.1*“ product manual. It is available free-of-charge at www.abb.com/knx.

ETS and the current version of the device application are required for programming.

The current application can be found with the corresponding software information for download on the Internet at www.abb.com/knx. After import into ETS, it appears in the *Catalogs* window under *Manufacturers/ABB/System components/Interfaces*.

The device does not support the locking function of a KNX device in ETS. If you use a *BCU code* to inhibit access to all the project devices, it has no effect on this device. Data can still be read and programmed.
