

Product Environmental Profile

Insulation Fault Locator

General information

Representative product

Insulation Fault Locator - IMDIFL12

Description of the product

IFL is an insulation fault locating device with 12 channel for ungrounded power systems with isolated neutral.
It works with Insulation monitoring device which detects that there is fault in the system and IFL locates where the fault has occurred in the system
This device provides the following features:

- Fast fault location (time < 5 s).
- Transient fault indication.
- Relay for fault indication.
- Individual LEDs for 12 channels.
- Configurable thresholds (low, medium, and high) for alarm.
- Configurable filtering times for highly disturbed ungrounded system.
- Dedicated commissioning mode for quick installation verification.
- Auto-detects and configures compatible toroids in commissioning mode.

Functional unit

To monitor and detect during 10 years insulation fault of a power systems with isolated neutral.
Type of earthing system = IT system
 $I_g = 3\text{mA}$ (IFL maximum fault current)
 $V_a = \leq 1000\text{V}$

Constituent materials

Reference product mass

595 g including the product, its packaging and additional elements and accessories

Plastics	22.3%
Metals	2.0%
Others	75.9%

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The Insulation Fault Locator presents the following relevant environmental aspects

Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 271.3 g, consisting of Paper (63%), Cardboard (36%), PE Polyethylene (1%), Polyester fiber (0.037%) Product distribution optimised by setting up local distribution centres
Installation	The packaging is disposed of during the installation phase
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains Electronic card (194g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 8% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years
Product category	Other equipments - Active product
Installation elements	No special components needed
Use scenario	6W at 100% load 100% of the time
Geographical representativeness	Global: Europe

Technological representativeness	IFL is an insulation fault locating device with 12 channel for ungrounded power systems with isolated neutral. It works with Insulation monitoring device which detects that there is fault in the system and IFL locates where the fault has occurred in the system This device provides the following features: • Fast fault location (time < 5 s). • Transient fault indication. • Relay for fault indication. • Individual LEDs for 12 channels. • Configurable thresholds (low, medium, and high) for alarm. • Configurable filtering times for highly disturbed ungrounded system. • Dedicated commissioning mode for quick installation verification. • Auto-detects and configures compatible toroids in commissioning mode.

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.7.0.2, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number :	SCHN-00287-V01.01-EN	Drafting rules	PCR-ed3-EN-2015 04 02
Verifier accreditation N°	VH25	Information and reference documents	www.pep-ecopassport.org
Date of issue	02/2018	Validity period	5 years
Independent verification of the declaration and data, in compliance with ISO 14025 : 2010			
Internal External X			
The PCR review was conducted by a panel of experts chaired by Philippe Osset (SOLINNEN)			
PEP are compliant with XP C08-100-1 :2014			
The elements of the present PEP cannot be compared with elements from another program.			
Document in compliance with ISO 14025 : 2010 « Environmental labels and declarations. Type III environmental declarations »
