

Product Environmental Profile

ABL8 FEQ24200 **Rectified and filtered power supply**

General information

Representative product	ABL8 FEQ24200
Description of the product	The main purpose of the ABL8 FEQ24200 is to convert electricity from 230-400 Voltage Alternative Current input to 24 Voltage Continuous Current output
Functional unit	To convert electricity from 230-400V AC to 24V DC for 10 years

Constituent materials

Reference product mass	14000 g including the product and its packaging
------------------------	---

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

Additional environmental information

The ABL8 FEQ24200 presents the following relevant environmental aspects

Manufacturing	Manufactured at a production site complying with the regulations
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 1130 g, consisting of cardboard (62%), PU foam (35%), paper (2%) and LDPE (1%) Product distribution optimised by setting up local distribution centers
Installation	The installation phase varies depending on the installation configuration (use of screws or not for example). As they lead to non significant impact, the installation operations have been excluded from the study scope. In addition, the installation phase includes the packaging end of life treatment.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains electronic card (279g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 88% Based on "ECO'DEEE recyclability and recoverability calculation method" (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Product category	Active products			
Installation elements	The installation phase varies depending on the installation configuration (use of screws or not for example). In this PEP, they have been excluded from the scope.			
Use scenario	Consumed power is 140 W 60 % of the time in Active mode, 38 W 25 % of the time in Standby mode, 0 W 0 % of the time in Sleep mode and 0 W 15 % of the time in Off mode.			
Geographical representativeness	Europe			
Technological representativeness	The main purpose of the ABL8 FEQ24200 is to convert electricity from 230-400 Voltage Alternative Current input to 24 Voltage Continuous Current output

Life cycle assessment performed with EIME version EIME v5.5, database version 2016-11.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.
