Product Overview

Excel tight buffered optical fibre cables have been designed specifically for internal and external applications. These bend insensitive core, compact, lightweight cables are extremely flexible and quick and easy to install. The cables are constructed around swellable reinforced yarns as common strength containing up to 24 colour coded 900µm tight buffered 50/125µm fibres, covered with a flame retardant, low smoke zero halogen, outer sheath. The print legend on the cable now also includes information regarding the DOP Number, Test and classification of the cable for traceability.

Excel tight buffered fibre optic cables are designed and manufactured to ensure that optimum performance is possible from
