EVoline® Port

EVoline Port let sockets and cables simply disappear. Just the collar and cover of the Port are visible on the work surface.

The easy pull-up motion let the high-quality aluminium body appear and subsequently a push-down motion let it disappear below the surface even with attached plugs. The patented rocking cover creates enough space for a cable outlet.

Dimensions in mm

Housing	Aluminium, anodised or lacquered
Rocking Cover	Stainless steel Lacquered plastics
Collar	Lacquered plastics
Installation	Flush-mounted Diameter Ø 102 mm
Surface thickness	10 – 50 mm
Configurable	yes
Retractable	yes (connected leads)

Patented rocking cover

Individual surfaces
